PROSPECTUS

This company has acquired the Leo group of seven claims, viz: The Leo, Keno, Evelyn, Edna, Latah, Royal Anne, and Rising Sun, situated within 3 1-2 miles of Hall's Siding on the Nelson & Fort Sheppard railway, within a few hundred yards of the well known Fern mine on the north, and adjoins the Monarch group to the southwest; the Silver King mine being about four miles to the north and the Porto Rico some three miles to the south, whilst the Flying Dutchman and Venus group, recently bonded to the Silver King Mining company for \$90,000, are in the

The main ledge on the property, running in a northwesterly and southeasterly direction, is composed of porphyritic quartz cutting through the granite formation. This ledge, which varies from 50 to 60 feet in width, can be traced from the Latah across Keno creek, through the Leo and into the Rising Sun claim, where it is lost sight of under a covering of soil and wash.

The ledge is well mineralized, and contains several parallel high grade pay streaks, running in the same direction

and varying from a few inches to two feet in width. The hanging wall is of decom-posed granite, and the foot wall is com-

posed of soft micaceous schist. so far, has been done on the Leo mineral claim, and consists of a shaft 20 feet deep, 4 by 6 feet inside the timbers. There are also three open crosscuts, No. 1 being about 40 feet long, 3 to 5 feet deep and 4 feet wide; No. 2 being about 70 feet long, 3 to 12 feet deep and 4 feet wide, and exposing the ledge for a width of 55 feet, and No. 3 about 45 feet long, 3 feet deep

It is proposed, in doing further development work, to sink some distance upon the ore in the main ledge at present exposed, and then crosscut below, with a view of cutting the numerous pay streaks which outcrop near the surface, and which in all probability unite with depth, and if a tunnel should be needed, there is a good site available lower down the hill.

WATER AND TIMBER

There is ample supply of excellent timber, suitable for building ord mining requirements, and an abundant supply of water in the creek for all domestic and milling purposes. Keno creek runs through several of the claims comprised within this group, and there is a good site available for the erection of a mill when necessary.

ASSAYS

Samples of ore taken from a number of different places in open cut No. 2 and from the pay streaks in the snaft, give the following assays, vizi

ing upon the charge of allowing four cows Mr. Charles Collins, assistant chief of the Rossland fire brigade, has just returned from the seventh annual convention of the Pacific Coast Association of rire Chiefs held at New Westminster on October 3, 4 and 5, to which he went as representative of the Rossland fire brigade.

Mr. Collins spoke with pride of the performance of the hose team from this city who took part in the firemen's tournament that was held at the same time with the convention. It was, he said, somewhat of a surprise to the fire-fighters of Washington, Oregon, Idaho and the coast cities of British Columbia, when the boys won the hub and hub and the dry test hose race, and all the more so, as in the hub as hub they broke the coast record of 22 1-2 seconds, lowering it to 22 2-5 seconds. They stood a good chance also, Mr. Collins believes, to win first place in the convention of the property on West Columbia, when the boys won and those who know the value of Columbia, when the boys won and hub they broke the coast record of 21-12 seconds, lowering it to 22 2-5 seconds. They stood a good chance also, Mr. Collins believes, to win first place in the winter season just coming on is always to run at large within the city limits. The Knights of Pythias and tue Order of Eagles have purchased the property, on West Columbia vesterday the property from Mr. John Watson for the sum of \$6,500.
