### "CLASS B" CALLED TO THE COLORS.

OTTAWA, March 29—Responding to a demand from the military authorities, the Military Service Council has decided to call up for service men in medical category "B" under the Military Service Act. Category "B" men are liable for overseas but not for combatant service. They are being called out because of the necessity of securing more men for railway construction and similar service. The official memorandum follows:—  
"A military demand for men other railway work has arisen, and it has therefore become necessary to draft all men in medical category "B" in respect of whom no other grounds for exemption exist."

"The Military Service Council is therefore issuing instructions to registrars to take immediate steps to call up such men."  
"Under the procedure heretofore adopted questions arising in regard to the exemption of men in medical category "B" on other grounds were postponed until men in the same medical category should be called up, and these men, as well as their employers and relatives will therefore be given an opportunity of presenting claims for their exemption."

### "CRITICAL TIME IN IRELAND'S FORTUNES."

LONDON, March 22—"These are critical moments in the fortunes of Ireland," said Former Premier Asquith in an address today. "We hear disquieting reports, but one thing is most urgent, not only in the interests of Ireland and the British empire, but in the interests of the allied cause and the future of the world, reconciliation in Ireland."  
"I refuse to believe that at this supreme moment British and Irish statesmanship is so bankrupt that it cannot find an honorable solution."

### COMING IN CANADA.

Ottawa, March 16—It is practically certain that Sir Geo. Foster, minister of trade and commerce, will introduce a daylight saving bill in parliament this session, and it will become law if not too strenuously opposed by members from rural constituencies.  
The adoption of daylight saving in the United States it is believed, will materially increase the chances of the bill being received with favor by the new parliament.

### GLASS EYE THAT MOVES.

Capt. J. L. Aymard, a British army surgeon, describes in the Lancet an improved glass eye which can move. The chief drawbacks to the ordinary glass eye are that, being simply a convex shell of glass it tends to sink back into the socket and is fixed in a stony stare. Captain Aymard gets over these difficulties by placing in the socket of the eye a sphere of living cartilage or gristle taken without risk from the patient's ribs. It is all one operation. While one surgeon removes the destroyed eye, another surgeon removes the pieces of cartilage from near the patient's breast bone. Two pieces are made into a little globe, which is placed in the socket, and the thin outer covering of the eye, the conjunctiva, is sewn over to hold it in place. The ordinary glass eye shell is inserted over this and is prevented from sinking backwards. Some movement of the eye by the wearer is said to be possible.

Wonderful results in the treatment of leprosy by the use of an oil extracted from a obscure East Indian plant known as "chaulmoogra," have been obtained by the French Government in Tahiti and other Polynesia possessions, according to Dr Felix Gautier, of the French Government Medical Service in Polynesia who arrived lately at San Francisco from Tahiti. By the use of this oil, coupled with tonic medicines, which keep the patient from becoming weakened by the ravages of the disease, some lepers have been permitted to leave the segregation colonies.
