

ORGANISER BUSY

J. W. Whiteley provincial organizer for the Loyal Orange Association was in the city on Monday after a three months' campaign through the north country. He states that the wheat seeding is all done from Warman to Battleford, but around Lashburn and Lloydminster seeding is much later owing to the heavy fall of snow this spring. The country to the east of the C.N.R. branch has the most of the wheat in and the acreage will be about the same as last year. Mr. Whiteley found the new settlers more hopeful during the last few days. During the cold spell they certainly had the blues.

The first Universal Motor Tractor, driven from common coal oil, and which is being introduced into western Canada by Rev. Mr. Coard, president of the Northwestern agricultural college, Regina, to be used in all farming operations for which hitherto horses and steam have been utilized, arrived in Regina, Tuesday, and will be put to work in a few days to demonstrate the use of the oil motor in agricultural economies. The motor is fifty horse power and will break prairie at the rate of fifty acres per day at a fuel cost of ninety cents per acre; it will haul three reapers or binders at a cost of 25 cents an acre for fuel; it will haul eight tons eight miles an hour at a cost of 75 cents per day, and in addition to doing all that can be done by steam, horses, oxen or mules in hauling; as a stationary motor it will drive all kinds of machinery, and with the addition of a small dynamo, will generate electric light for farm and village use. Attached to every motor is a lorry capable of carrying two tons. The first public demonstration of the universality of this motor will take place in Regina and will be duly announced in the press. Something, it is true, was done in nearly every case, but that something could have been accomplished by correspondence.
