Respecting the Toronto World
report, republished in the Reporter
last week, in regard to the smallpox
epidemic in Eastern Ontario, we have
received a characteristic letter from
our old friend, Mr. C. C. Slack of
Montreal. The imputation of igno-
rance and greed in the article arouses
Crawf's ire, and he serves up a red-hot
verbal dose for the maligners of the
people of this county that should bring
out a rash if their blushers aren't
broken. There is too much caspium
and vitriol and Indian turnip, etc. in
the letter to make it "safe" for publi-
cation, but it expresses very truly the
opinion of many in this section.
Another of our most esteemed con-
tributors has sent us a few well-written
stanzas along the same line, but he,
too, though proceeding in a milder
vein, serves up sarcasm that, though
well deserved, bites too deep and is
aimed too direct for the columns of a
village paper.

The inhabitants of the Island of
Jersey, from whence came the cele-
brated Jersey cattle, says the Ameri-
can Farmer, have a very simple way
of testing milk to tell pure from im-
pure. They simply boil the milk in
an enameled sauce pan. If it boils
without curdling it is said to be fit for
use. If it curdles before it begins to
boil, they consider it impure, and it is
not used as food by the people or their
most valuable calves.
