

SAID HE COULD NEVER BE WELL

"Fruit-a-lives" Restored Him to Health

150 Avenue Price IX, Montreal.
"For three years, I was a terrible sufferer from Dyspepsia and my general health was very bad. I consulted a physician and took his medicine but I did not improve; and finally he told me that I could not be cured."
At this time, a friend advised me to try "Fruit-a-lives". After taking two boxes, I was greatly relieved; and this fruit medicine made me completely well. My digestion and general health are now splendid."

THE NEW BRIDGE AT EDMUNDSTON

Local Branch of Engineering Institute Holds Address, on Construction of Substructure, by C. McN. Steeves

An interesting address on the substructure of the new international highway bridge at Edmundston was given before the St. John branch of the Engineering Institute of Canada by C. McN. Steeves, M. Sc., M. E. I. C. The lecture was illustrated by the use of lantern slides.

After explaining the need for the bridge and the reasons for its being constructed, Mr. Steeves dealt with the various problems which confronted the engineers at the commencement of the undertaking. Two features had to be considered in choosing a site, viz., elimination of railway grade crossing and safe clearance above high water. He next told of the physical characteristics of the soil and of the force of the current.

He then went into a minute and technical description of the substructure which consists of two concrete abutments and three semi-reinforced concrete piers. He told how the work was carried on, the concrete mixed and explained the equipment used on the job.

The work was commenced on May 10, 1921, and completed on Nov. 26, 1921. The contract time set for the completion of the work was Feb. 20, 1922. Twenty-nine carloads of cement, 142,000 pounds of steel reinforcing and more than 5,000 cubic yards of gravel were used in the job. The maximum number of men employed at one time was 120.

The contractors were D. C. Burpee & Son, with whom Mr. Steeves was associated. S. J. Chaplain, M. Am. Soc. C. E., was engineer-in-charge for had L. DeB. Roy, assistant engineer, as his representative on the work. L. Am. Soc. C. E., represented the Maine State Highway Commission, his deputy on the work being H. E. Towne. A. W. Gregory, of the public works department, represented both governments as inspector of materials.

At the conclusion of his address, Mr. Steeves was heartily thanked by the chairman, following which a general discussion of the subject place among the members.

Jacksonville Jottings

Most of the farmers from this section are hauling their potatoes at \$1.25 to \$1.50. A poor outlook for big fertilizer bills.

Everyone is glad to see Walter Craig on the road again although still lame. He has been confined to the house since last October with both legs broken.

Nearly every home has been visited with la grippe.

Mrs. David Phillips is around again. She was operated on for appendicitis two weeks ago.

The stork made a midnight call at the home of Willie Alerton leaving

a beautiful little daughter—Lillian Muriel.

Mrs. Charles Hourihan has returned home from the Hospital. She has been there since Christmas.

The young people met at the home of Wilmet Kimball for a social sing. Everybody enjoyed a pleasant evening.

The stork sure is a busy bird. He left a boy with Ernest Ouberton, one at Miles McLean's and a girl at Gordon Lawrence's within the last two weeks.

A good many of the people from this vicinity are attending the meetings at Avondale held by Lee Good.

Mr. and Mrs. Basil Harper were visiting at Charlie Grey's on Sunday last. The Ladies Aid met at the home of Mrs. Samuel Harper last Friday.

Walter Craig's family have all been sick with flu but are on the mend. Johnnie Kilpatrick had the misfortune to cut his foot badly. Dr. Grant is attending him.

Wilmet Estey was called to Plaster Rock to attend the funeral of his sister, Mrs. Turney Johnson.

NAMING THE FARM

The tendency on the part of farmers in many sections of the country to name their farms is growing rapidly, and we would like to see the practice adopted around here. Then, too, every farmer makes a specialty of some product. He has a special variety of seed wheat, or potato seed or seed corn or vegetable seed to sell. Possibly he gives attention to breeding fancy cattle, sheep or hogs, or raises chickens for the market. Then what could be more appropriate than a neat, catchy letterhead setting forth that specialty, and carrying also the name of the farm. And why not have an envelope with the name and return address printed in the corner, to insure its safe return to the writer if it is improperly addressed, or if for any reason it might go astray? Nothing is more sensible, and since the farming business is just as much a business as anything else, why not conduct it in a businesslike way? Come in and let us show you how cheaply it can be done—and how quickly.
