THE ARCTIC REGIONS.

According to the despatches of Captain McClure, the chances are that Sir John Franklin did not perish by starvation in the Arctic regions, for game is said to be quite abundant there. At the commencement of winter, says Captain McClure, "we have been fortunate in securing the shundant there. At the commencement of winter, says Captain McClure, "we have been fortunate in securing the shundant these of fat; and on the first of April we had upwards of one thousand pomner of the securing their third winter they seem to have fared own been states—"A sumply of game has enabled a most of to be issued trice washly, and the usual Christman-feativities have passed off with the greatest cheerful here. At the crow were determined to make it memorable; but the grand features of the day were the enormous plum puddings, haunches of version, rosated haves, have soup, with past, might be "in a made man." In serving his only experience more easy to dray it only experience more easy to dray it on a passed upwards of two years on their own resources in these regions, enjoying such excellent health, and so joyful and happy." In another place Captain McClure, "In another place Captain and which proved an excellent sanities or rus Passa. It is impossible to conceive any stranger wintessing the scene could but him they straight the strain of the content of the strain o
