Peas were scarce, and sold at 95c to \$1.00; the latter price was paid only for No. 1 stock.

Corn—A few small lots of Flint sold at 80c; the inquiry for this kind is small, the Dent corn being cheaper.

Barley brought 75c to 80c, generally 75c; the quality is poor; prices range from 90c to \$1; demand good.

Hay—Sales ranged from 35c to \$1.10 for the week; the market was easily affected by receipts; \$1.00 to \$1.10 were closing values.

Dressed hogs opened at 25c to 25.5c, and closed at 25c to 25.5c, with very few sales at 25.5c.

Live hogs were steady, at \$4 for singers; deliveries were good; heavy hogs and sows find a slow market, the latter going at \$2.50; the trade in young pigs was about as slow as usual, the range of prices being \$2 to \$4 a pair.

BAYLEY'S

U. S. SQUADRON FOR AFRICA TO SET THE WORLD RIGHT

Secretary Long Announces a Change in the Navy Department's Attitude.

Washington, Nov. 1.—Rear Admiral Schley will be ordered to East African waters. His squadron will be increased to whatever extent the situation demands, says Secretary of the Navy John D. Long. The South Atlantic squadron has been ordered, or soon will be ordered to the scene of the South African hostilities. It is the second great development from the country's standpoint in the European crisis and, strangely enough, follows the notification by Great Britain of Germany's proposition for the partition of the African continent. The attitude of the country, one of hostility to the German proposition and German pretensions as to Samoa, cannot fail to be regarded as the greatest significance. The European practical illustration of this country's attitude, is credited with having impelled Germany to make the first test. The result is that the United States has demonstrated her friendliness to Great Britain.

Secretary Long was found at his apartments at the Portland. In response to a question, Long, in his report will be ordered to East African waters. The squadron will be increased to whatever extent the situation demands. I do not think, at present, that a larger squadron than the Chicago, the Montgomery and the Wilmington is necessary, but, as I have said, there may be contingencies which would make it advisable to largely add to these vessels.

THE FEAR OF HUMBLED.

Prevents Many People From Trying Good Medicine.

Stomach troubles are so common and in most cases so obstinate to cure that people are apt to look with suspicion on any remedy claiming to be a radical, permanent cure for dyspepsia and indigestion. Many such pride themselves on their acuteness in never being humbugged, especially in medicines.

This fear of being humbugged can be carried too far, so far, in fact, that many people suffer for years with weak digestion rather than risk a little time and money in faithfully testing the claims made of a preparation so reliable and universally used as Stuart's Dyspepsia Tablets.

Now Stuart's Dyspepsia Tablets are vastly different in one important respect from ordinary proprietary medicines for the reason that they are not a secret patent medicine, no secret is made of their ingredients, but analysis shows them to contain the natural digestive ferments, pure aseptic pepsin, the digestive acids, Golden Seal, bismuth, hydrastis and nux. They are not cathartic, neither do they act powerfully on any organ, but they cure indigestion on the common sense plan of digesting the food eaten thoroughly before it has time to ferment, sour and cause the mischief. This is the only secret of their success.

Cathartic pills never have and never can cure indigestion and stomach troubles because they act entirely on the bowels, whereas the whole trouble is really in the stomach. Stuart's Dyspepsia Tablets taken after meals digest the food. That is, all there is to it. Food not digested or half-digested is poison, as it creates gas, acidity, headaches, palpitation of the heart, loss of flesh and appetite, and many other troubles which are often called by some other name.

They are sold by druggists everywhere at 50 cents per package. Address F. A. Stuart Company, Marshall, Mich., for little book on stomach diseases, sent free.

TRACTION ENGINES IN WAR.

London, Nov. 1.—There was an extraordinary military parade at Aldershot, when fifteen traction engines and 40 trucks were inspected previous to their departure for South Africa. A stretch of sandy, rocky road was selected for the tests, and gave an excellent chance to observe the points of the engines. A steep ditch, with banks two and three feet high, were safely traversed. Though at times the wheels sank axle-deep, other engines pulled out the hapless ones. The Duke of Connaught and Princess Louise, and Victor Napoleon attended the trials, and were much pleased with the result. Twenty-four of these engines will be dispatched to South Africa.
