THE SCIENCE OF NATURE.

A NEW SCHOOL BOOK,

ENTITLED

FIRST LESSONS IN

CHEMISTRY AND GEOLOGY

As Applied to Agriculture.

BY J. EMERSON KENT, A. M., M. D.

A NEW school book—the first American work ever issued as a first book, or "First Lessons in Chemistry and Geology applied to Agriculture," designed as the first step for the young to be used in all our common schools, is now submitted to the educational public. Some indeed protest against the introduction of all modern improvements in making the earth productive; but the great agricultural interests of our nation depend upon a rising generation of practical farmers, who will till the soil as much as comprehensive knowledge of the laws of chemistry, as by the sweat of the brow.

The subject of agricultural chemistry cannot but soon connect itself to the world as the most important of all studies, and in fact the wealth of this country would be doubled within one year were all that saved which is now lost by stupid, bungling agriculture. A volume of recommendations could be given to the public, but is not necessary.

School Committees and Teachers will be furnished with a copy gratis, for examination, by mail, post-paid, on application to the undersigned. Price 25 cents.

DAYTON & WENTWORTH, Publishers, 86 Washington street, Boston, Mass.

N. B.—A few men of the right ability are wanted to travel through every State in the Union, and introduce this work in schools. A liberal commission will be paid. Gentlemen who travel for health or recreation will find this occupation a lucrative and agreeable employment. Address as above. Nov. 1, 1854.—5t
