

SCIENTIFIC AMERICAN.

PUBLISHED BY MUNN & CO., 37 PARK ROW, NEW YORK.

This splendid weekly, greatly enlarged and improved, is one of the most useful and interesting journals ever published. Every number is beautifully printed on fine paper, and elegantly illustrated with original engravings, representing new inventions; novelties in mechanics, manufactures, chemistry, photography, architecture, agriculture, engineering, science and art. Its practical suggestions will save hundreds of dollars to every household, work-shop and factory in the land, besides affording a continual source of valuable instruction. The Editors are assisted by many of the ablest American and European writers, and having access to all the leading scientific and mechanical journals of the world, the columns of the *Scientific American* are constantly enriched with the choicest information.

The yearly numbers of the *Scientific American* make two splendid volumes of nearly one thousand pages, equivalent in size to four thousand ordinary book pages. Specimen copies sent free.

Terms, \$3 a-year, \$1.50 Half year, clubs of ten copies for one year, at \$2.50 each—\$25

EYE-SALVE IN "GRANULAR LIDS," AND CASES OF CHRONIC OPHTHALMIA.—Dr. John Williams (*Dublin Quarterly Journal*), after long experience, speaks most confidently of the following ointment:—R Arsenica sulphureti 2 grs., unguenti citrini 2 drs.; axungia preparat. 6 drs.—M. bene. The upper eyelids should be everted in cases of "granular lids," and about the size of a hemp-seed of this ointment should be applied with a camel's-hair pencil, which must be introduced into the superior palpebral sinus, to the diseased conjunctiva. In suggesting this local remedy he is not unmindful of general treatment.

A little girl in England sat down on a block of wood which had been sprinkled with carbolic acid as a disinfectant. She was so severely burnt as to cause her death in three days.
