Prices of Building Materials.

CONDITION OF THE MARKET.

As a portion of the new work commenced in the early spring is nearing completion, dealers note a steady demand for small lines of builders' supplies, such as glass, paints and oils, plumbers' supplies and general hardware. The country trade maintains the steady improvement already reported. The demand for lead and iron pipe and galvanized iron is steady, and prices remain unchanged, in fact a dearth of certain sizes of iron pipe is reported, the cause of which is assigned to the coal strike. There is a fair enquiry for firebricks, and prices are a little firmer. The cement market is much the same, business ruling quiet.
