Pribiloff Islands, St. Paul and St. George several hundred times, and am perfectly familiar with the sealing business as conducted on those islands, and understand the migrating habits of the fur seal. From about the first of May to about the first of July of each year the fur seal is migrating north through the Unimak and Akutan Passes to these islands for breeding purposes. They go to no other place in the known world except these islands and Copper Island for breeding purposes. After the breeding season of about a month they begin to migrate south, and until into November of each year are migrating south through Behring Sea. During this season, from May till November, the fur seal are plenty in the waters adjacent to the Pribiloff Islands, are migrating to and from these islands, and are at all times very plenty between Unimak Pass and said islands in a track about 30 miles wide, which seems to be their highway to and from said islands. The schooner "Carolina" and her boats when seized were directly in this track. I was present at time of seizure.
