

University of Toronto.

ANNUAL EXAMINATIONS: 1876.

DEGREE OF M.B.

MEDICAL JURISPRUDENCE.

Examiner: FRANCIS RAE, M.D.

1. The existence of what signs would enable you to determine that a woman has been recently delivered of a child?
2. How is death caused by hanging, and what are the *post mortem* appearances?
3. Define rape, give the sources of medical evidence, and state the manner in which age modifies the crime.
4. Give the symptoms and *post mortem* appearances present in poisoning by opium, the quantity necessary to destroy life, and the period at which death occurs.
5. How do hallucinations differ from illusions? Mention the forms of insanity of which these constitute the main features.
6. What diseases and conditions may render a person incapable of making a valid will?
