—A sensation has been caused in coal circles in Montreal by the rumor that a huge swindle by a coal firm has been unseathed, and that the seizure of 10,000 tons of coal has been made by the cuntoms atthorities. It is stated that the swindle has been going on for some years. It is a very difficult under to get positive information. Enquiries elicited the statement that the rumor is generally believed in the trade, and that the swindle was carried out in the following manner: Sales of Scotch coal were made by the firm to steamships leaving here for the return trip, but lower port coal was substituted, and that has a higher price obtained, as well as a rebate of nixty cents a ton allowed on Scotch coal exported. So that not only was the ship hothested, but the customs defrauded. The fraul is asid to have be en discovered by a shipping firm, who laid information before the collector of customs. The latter refused to make any statement about the case.
