WORKING WITH CAMADIANS IN EVERY WALK OF LIFE SINCE 1817

WHAT IS HI FI?

by HAZEN MARR

By now all of us have heard more than enough of the term Hi Fi. It has been reduced to the status of the soap opera cliche. In a very few years it has come to be known universally as a description of audio reproduction with a describes a situation where the listener cannot distinguish dreams suddenly became a reality.

between the reproduction and the original.

So now on this rather dull describes a situation where the listener cannot distinguish dreams suddenly became a reality.

20,000 Cycles Per Second A few words about the requirements of truly high fidelity "Fishy Jack's" sporting camps on the upper reaches of the St. John may be helpful. To begin with, since the human ear is able to River in the wilds of New Brunswick. Right from his New York detect sounds whose frequency lies between the limits of 20 cycles office, Rodney had contacted Jack after leafing through the pages or vibrations per second and 20,000 cycles per second, a reproducer of an "American Sportsman" magazine and discovering, quite by claiming to have high fidelity must do a reasonably good job of accident, his singularly intriguing advertisement. reproducing sounds within this range. By "reproducer" I mean the entire system from the microphone which picks up the musical peformance to the loudspeaker which eventually emits a sound which represents what the microphone "heard", regardless of whether in the interim the sound was recorded, broadcast, transmitted over telephone wires or commented on by Rawhide. While doing this the system must not introduce any sounds of its own which were not present in the original performance and it must present all frequencies with the same relative intensities they had in the original. If you read shrough these clavery, worded physics in the original. If you read through these cleverly-worded phrases you will come to believe that the only thing that can do what is required is the original and so I must add that a reasonably close approach to this can be attained and that in its present state of the approach to this can be attained and that in its present state of the approach to this can be attained and that in its present state of the approach to this can be attained and that in its present state of the approach to this can be attained and that in its present state of the approach to this can be attained and that in the present state of the approach to this can be attained and that in the present state of the approach to this can be attained and that in the present state of the approach to this can be attained and that in the present state of the approach to this can be attained and that in the present state of the present state development high fidelity cannot take the place of the original.

Co-axial Speakers One of the main things which keeps commercial "Hi The cabinet should considerably more than provide a foun-Outside the air looked damp and cold but Bowerson, having heard dation for expensive hand-rubbed finishes (a fact not often and read about the terrors of the Canadian climate, had not left the audio spectrum. How it does this is a fit subject for a book and so will be left out here. The speaker itself must respond to all frequencies which make up the sounds to be reproduced. Coaxial or multi-unit speaker systems which divide the audio spectrum into convenient segments and provide a speaker best adapted to handle each segment are best (and, need it be added, quite expensive).

Rumble in the turntable motor (which is not noticible in ordinary phonographs which do not reproduce rumble frequencies) is another fault that can only be cured with money in the form of

is another fault that can only be cured with money in the form of then his knowledge of how natives of any country can gradually accurately-built parts in the turntable which do not vibrate.

Perhaps the largest single factor which lowers the quality of prevented him from saying anything. reproduction in Hi Fi and all equipment is a worn stylus. This con-

PUZZLES

by James Wilkinson Miller

Concocted puzzles may permit Solution, thanks to mortal wit; But Nature's puzzle still resists Our suppleness of mental wrists.

Human reason labors hard: Here a shred and there a shard Of an answer yet to find, Firm and sure to conscious mind;

Here a glimpse, though dim and rough, Of the hue of Nature's stuff; Here a semi-intimation Of its nice reticulation. Poetry may seek to tell How human hearts submit, rebel,

Nature's unsolved how and why; But when the poet fabricates New puzzles then he abdicates.

Wonder, or grieve, confronted by

An AMERICAN HUNTER in New Brunswick.

by WILLUS HAMILTON

In the long afternoons in the main office of the Shino Shoe Polish Company in the heart of Manhattan, Rodney A. Bowerson special mystical and expensive pecularity. The mysticism is often dreamed of the day when he would be able to take time off the natural result of taking a word that was invented by engineers for their own use and using it on an uninitiated public tion in the frigid Canadian wilderness. Ever since he had read those without supplying a proper definition or any definition for stories of the Mounted Police and the Couriers de bois back in the that matter. High Fidelity (if you will pardon my antiquated spelling of it) can only be used relatively in the sense that fidelity can be high or low etc. So in the same manner that soaps can claim to "get white things WHITER", so a phono- he was going to Canada next year for sure. But many next years graph manufacturer can claim to have high fidelity and mean almost nothing. "Fidelity" as applied to audio can be defined as a faithful reproduction; thus "highest fidelity" third vice-president of the prosperous company, his cherished

> So now on this rather dull, damp, and cold October morning, Bowerson found himself lying prostrate on a bunk in one of

> The clock by his bed struck six o'clock. Bowerson groaned and opened his eyes, a little startled to find that he was actually not in another dream. He glanced sleepily over the side of his rusty bunk. Everything was just as he had left it the night before. His trunk full of clothes sat alone in one corner of the room; his miscellaneous travelling necessities looked up at him from an open suitcase on the floor; and four high-powered rifles lay impatiently waiting on the top of the rustic dresser

> tion. Television itself had surely crept from the States into the remotest corners of the world.

After breakfast, Rodney was assigned a guide for his con-Fi" from being high fidelity is the speaker and its cabinet. venience and he made ready for the excitement of the big day. apparent in much of the advertising). Proper cabinet design New York unprepared. Over his flannel trousers he pulled a pair is necessary to help the speaker reproduce the lower end of of flashing red wool breeches, and over his grey shirt he wore two the audio spectrum. How it does this is a fit subject for a heavy sweates and a red bushman's jacket lined with sheepskin

condition themselves to all sorts of irregularities and discomforts,

A feeling of importance swelled up within Rodney when he diton not only makes the music sound like old chains being dragged took his first step into the woods. So quiet and peaceful was the diton not only makes the music sound like old chains being dragged took his first step into the woods. So quiet and peaceful was the over a tin roof but it performs on a miniature scale the much lauded operations of the Massey-Harris disc harrow on the record.

Expensive

To sum up; Hi Fi equipment is expensive. In this field more than in most others, you get what you pay for. Excepting the valid shortcut of home construction and the use of the good equipment available in kit form, true high fidelity is in a higher price range than is television.

Boyerson made no answer and didn't ask any more questions. Bowerson made no answer and didn't ask any more questions.

> At noon the san escaped the mist that hid it in the morning ours and glared down brightly on Bowerson and his guide Rodney found hs body perspiring most avidly and this, coupled with his growing fatigue, compelled him to start back for camp early in the afternoon.

The trip back was almost unbearable to Rodney. His perspiration-soaked clothing clung to his aching body and irritated him in a dreadful manner. As the pair neared the camp, he groaned to his guide to go on ahead and leave him to stroll back in his own time.

When the guide had disappeared from view, Rodney's eyes and ears suddenly became alert in an instinctive way when he sensed a rustling in the bushes off to the right of his path. He stopped dead in his tracks, released the lock on his rifle, and peered into the woods, his eyes bulging out of his fat face like two golf balls. Then he saw it. It was a deer. He could decipher the golden brown of he saw it. It was a deer. He could decipher the golden brown of its flank as clearly as the green of the trees around its sleek body. He leveled his rifle in the direction of the animal and reached for the trigger with shaking fingers. He pulled. The rifle cashed and forced his shoulder backward with such violence that he nearly lost his balance. He looked up. The bushes suddenly parted and his target came crashing towards him. He elevated the rifle again and then let it fall to the ground with a sigh, as the brown cow walked then let it fall to the ground with a sigh, as the brown cow walked contentedly out into the open.

GRADUATES AND UNDERGRADUATES

— VARIOUS FACULTIES —

1000 CAREER OPPORTUNITIES AND

1400 SUMMER POSITIONS IN THE PUBLIC SERVICE OF CANADA

Representatives of the Civil Service Commission will be on the campus to interview interested graduates and undergraduates.

The Place: CONFERENCE ROOM, STUDENT CENTRE.

The Dates: JANUARY 18 TO 20

The Time: 9:00 A.M. TO 5:00 P.M.

You are invited to see these representatives

OPPORTUNITIES

IN ONE OF CANADA'S FASTEST-GROWING

RETAIL ORGANISATIONS

LEADING TO FUTURE RESPONSIBILITIES . . .

We are planning to employ a number of university graduates who are interested in achieving a stimulating career. They should possess energy, resoucefulness, initiative, good health and a willingness to work.

Suitable academic background would be successful work in commerce, business administration, social sciences

Suitable applicants will find challenging positions in the Mail Order and Retail sections of our growing Company.

Those invited to join our organization will find opportunities in sales . . . merchandising . . . accounting . . . credit . . . advertising . . . or any one of a dozen or more interesting activities leading in time to positions of responsibility.

A representative of our Company will be at the University on Monday, January 23, in order to interview interested members of the graduating class. Details available from the Public Relations office
