## \*\*\*\* South Chatham Should Wake Up

Apparent Reckless Disregard of the Health of the Pupils of the Central School.—A Suggestion for Alleviating the Danger

\*

The Central school will be opened again next Tuesday, after being closed for thirteen school days, on account of the recent outbreak of diphtheria among the scholars. During these thirteen days the city has suffered an expense of approximately \$50 a day, through teachers' salaries, etc., making in all a total expense of about \$650, for which no return has been made or ever can be made. Why is it that the city has been forced to practically throw away \$650 ften And what steps should be taken to prevent a re-occurrence of the same forced these means of the same for these are questions which appeal

prevent a re-occurrence of the same?
These are questions which appeal
very strongly and seriously to the
thinking men of the city, and the
men who are, year after year, contributing taxes towards the maintenance of public institutions. There
is no doubt in the mind of any
reasonable citizen that this money is
a complete loss. Some might say that
the teachers will, when the school
opens again, work harder and gain
up the time which has been lost.
This, however, is impossible. Anyone who knows the system upon which one who knows the system upon which the Central school is managed will also know that the teachers are ex-erting themselves to their utmost every day of their lives, so that the time which has been lost has been

lost forever. lost forever.

The question which is interesting the public to-day is, what caused the outbreak of this contagious disease in the school?

Some have gone for enough to contribute it to defect it with the public of the contribute it to defect it with the contribute of the contribute

Some have gone far enough to contribute it to defective plumbing in the school building. The sanitary expert who has examined the school, however, does not encourage this belief. He says himself that he does not think that the plumbing caused the outbreak of diphtheria. He also says that he would not pronounce the school unsanitary, yet it is his opinion that the school would not stand a severe test as to its sanitary condition. The plumbers under his direction are now at work putting 'the tion are now at work putting the plumbing of the school in such a con-dition that it will stand the severest

anitary inspection.

If the plumbing did not cause the outbreak of the disease, then what did? There seems to be no doubt that something in the school was responsible for it. Any person who has interest enough in the health of the children to take the trouble to enter the school yard and cast a glance towards the west side of the play-

towards the west side of the playground may, perhaps, receive enlightenment on this question. Here
a deplorable state of affairs exist
and has existed for some time.
The western boundary of the small
playground is lined with old barns,
stables and outbuildings—cess pools of
dirt and filth—and the poisonous
odors issuing from these buildings
permeate the air of the play-yard,
particularly in the warmer weather,
and the children of the school inhale
this poisoned air into their systems this poisoned air into their systems every day of their lives. Ask any medical man if this state of affairs is conducive to the health sand children who attend that

There is, apparently, only one way to rid the school of this nuisance, and that is to enlarge the playgrounds by purchasing the three lots which are wedged in between the present school grounds and Queen street. This is, of course, a matter of expenditure, but what is \$5,000 as compared with the health of a thousand school children? It is a matter of \$5 achild and where is the parent in the city who would not willingly pay cut \$5 to have his child relieved from an unhealthy condition. The most of the parents,, if they were acquainted with the true state of affairs, would not only think the investment a good but would demand such an action on the part of the Public School Board.

It is well known that growing children need fresh air, not only in the school, but also in the school yards. They should also have as large a ground as possible to play in. Any person can readily see that the present cramped up quarters called a school yard, where one thousand pupils remain huddled together during the recess hours, is by no means large enough. The boys tannot throw a ball without endangering the lives of some of the smaller pupils, and there is not room for even a game of tag—except perhaps squat tag—and every person knows that a boy cannot develop physically or mentally unless he is given a certain amount of exercise and allowed to enter into athletic sports.

athletic sports.

The Central school in every other The Central school in every other respect is a model school, and the credit of this is due the School Board. But they should not stop here. They should have as large a degree of perfection in the school yard as they have in their building and teaching staff.

staff. Toronto this year is expending \$72,000 in enlarging school yards. These yards, which are now consider-These yards, which are now considered too small, were, in years gone by, thought sufficiently large. Chatham, heretofore, has not been slow to move in the promoting public improvements and no hestitation should be evidenced now, especially when the present question is of such vital importance.

#### A SUCCESSFUL YOUNG CANADIAN

County Treasurer J. C. Fleming received an invitation to attend the exercises of the Medical and Dental College, San Francisco, Cal. When his nephew, Andrew Fleming Dollin, received his diploma, he having graduated from the college as a dentist. Mr. Dollin's success shows what pluck and perseverance will do. When he left here a little over six years ago, beyond a good education, he being graduate of the C. C. I. and C. B. C. Mr. Dollin had no capital. Securing a situation on the electric street railway he worked up to the position of conductor. One of the men who rode on his car was an elderly and influential dentist of San Francisco. He took an interest in the bright young Canadian and induced him to study dentistry. Mr. Dollin used to study at night and during spare hours, He had a tourist run, and often on wet days he managed to get a chance to study at his work. About three years ago he married a girl from Kent County but still continued his studies. Some idea of the kind here a little over six years ago, his studies. Some idea of the kind of stuff that the man is made of may be gathered from the fact that he used to walk in to the C. C. I. every school day from his home six miles out in Dover Township. His early training in endurance stood him in good stead in the west and he was able to stand the continued strain of work and study and finally success rowned his efforts. His triends in crowned his efforts. His friends in Chatham had no inkling of his inten-tions until they received an invitation to attend at the exercises when his diploma was granted.

DON'T WORRY.

The world is wide In time and tide, And God is guide Then do not hurry.

That man is blest Who does his best And leaves the rest,

is less desirable because lived in nar-rower channels than in the larger towns and cities. Petty local jeal-ousies and a mean distrust and dis-like of those in similar business is usually characteristic of the business and professional men in the smaller

These undesirable traits have not These undestrable traits have not yet been entirely eliminated from the ranks of Chatham's citizens. This is the best city of its size in Ontario, and there is abundance of business for all citizens of all classes. Could some scheme not be devised by which our business and professional men might get together, become better acquainted, and learn each other's

acquainted, and learn each other's good qualities.

It was suggested in a recent issue that a Canadian club be formed upon the same plan as the one in Toronto. This would, without doubt, largely conduce to the desired end. If any-body can suggest any better plan to accomplish the end sought, this Great Home Journal will gladly give the plan to the public. plan to the public.

In view of the fact that the Central school has now been closed for some time on account of the pre-valence of diphtheria, it might be well to point cut that many of the parents of the city have been known to send some of their children to school when perhaps one remains at senot when perhaps one remains at home suffering from some contagious disease. This is a very dangerous course to pursue and such parents should be warned against so doing. There seems to be no doubt that if proper precautions had been taken when the diphtheria first broke out in the school much trouble might when the diphtheria first broke out in the school much trouble might have been saved. The principal of the school cannot be held responsible. The parents themselves should be as energetic as the authorities in working against the spreading of contagious diseases in the schools. In many cases the parents are inclined to think they are doing something clever and diplomatic by smothering up the fact that they have contagious diseases in their homes and

ering up the fact that they have con-tagious diseases in their homes and by sending the non-affected ones on to school. This, instead of being clever is, on the other hand, very wrong and foolish. Parents should think twice before they endanger the health of a whole school full of chil-dren. This is a matter for such parents to think over and, if neces-sary, the authorities should act in ary, the authorities should act in he matter.

Upon several occasions lately Col. Rankin has been obliged to deliver lectures to the men of his regiment for negligence in their attendance at drill. Why is it that the men do not turn our regularly?

A young man stands on the side-

A young man stands on the side-walk when the regiment is marching down the street. He sees the soldiers dressed in their brilliant uniform dressed in their brillant uniforms and hears the complimentary remarks from the spectators on the street. He longs to wear such a uniform and desires to place himself in a position where he will attract attention and be talked about. As a result he joins the regiment

be talked about. As a result he joins the regiment.

After he has been a soldier for a short time the novelty begins to wear off and his military duties become irksome. As a result he tires of the the rifle and stays away from drill simply because he has not sufficient manhood, and there is not enough moral fibre in his nature to compel him to live up to his duties. He takes an oath that he will be present but he even disregards his word of but he even disregards his word of side a bottle!

The time has fully come when Chatham should be relieved of some of the village swaddling clothes which have clung to it since the day when it was a frontier village.

It is a well established fact that life in the smaller towns and villages.

Not long the Colonel, in exhorting the soldiers to attend drills he down.

the soldiers to attend drills, he drew attention to the fact that the mem-bers of the band were always regular in turning out. Why is it that the band turns out better than the solband turns out better than the soldiers? Because the members of the band are all musical and fond of music so that their duty does not become irksome. Here is a suggestion for those in command of the regiment. If some means could be provided whereby a spirit of friendly rivalry and a fondness for drill could be instigated among the soldiers possibly the curtain lectures of the Colonel would not be necessary.

Men are, in a good many ways, like children. They do what they like to do in the matter of exercise. A professional man in an office should take exercise. If he had to do this by taking long walks or sawing wool he would soon tire of his exercise and discontinue it. He, however, becomes interested in bowling, develops

and discontinue it. He, however, becomes interested in bowling, develops, a fondness for it, and thus he gets his exercise and often neglects his business in order to bowl on the green. Most children do not like school work, and get it is said by the teachers of the Collegiate Institute that the greatest punishment for a scholar in the commercial forms of a scholar in the commercial form is to deprive them of using the type-writer. They develop a liking for their work and they need no driving. Thus with the soldiers. If they could become interested in military work everything would be plain sailing. This is a matter for the officers to think about
