

"Mac's" Patent Sewing Machine Stand.

THE Sewing Machine business has been worked up to such a pitch that it is difficult to get a poor Sewing Machine now-a-days, and it is difficult to know which machine is truly the best. Every agent claims he has the very best; every manufacturer the same. But to come down to the fine thing, although a machine will do its work in a different way and by different movements they all do the same work and do it equally well, if properly operated on, and as for durability we find very old machines of every description doing as well as when new, and we also find new machines of all sorts used up in a very short time. It is generally ~~found~~ that are wanted, and not steel, when a Sewing Machine now-a-days will not do well.

This new and useful stand is adapted for any kind of a Sewing Machine.

This stand is truly a novelty and a useful article and is sure to be a favorite with the ladies, and especially mothers, for they can sit at the machine and sew, and at the same time—by means of an attachment—keep the cradle in motion, and not let the darling wake up. It has several other very important points which will make it a general favorite and desirable for the household.
