

## HOW TO GET BETTER LIGHT FROM COAL OIL (Kerosene)

Tests by Prof. McKergow, McGill University, Montreal, on leading oil-burning lamps show the Aladdin Mantle Lamp is the most economical and gives over twice as much light as the Rayo and other lamps tested. It is odorless, safe, clean, noiseless. Guaranteed. Better light than gas or electric. To introduce the Aladdin we'll send a sample lamp on 10 Days Trial. Agents WANTED. Experience unnecessary. Every Ask for Particulars home needs this lamp. One agent sold over 1000 on 10 days trial. Another sold 900 worth in 15 money back guarantee, not one returned. Another sold 800 worth in 10 days. Evenings made profitable. Ask for agents prices and trial offer days. MANTLE LAMP COMPANY 225 Aladdin Bldg. Montreal and Winnipeg, Can.

## Capable Old Country DOMESTICS

Scotch, English and Irish.  
Party arriving about Oct.  
12th and fortnightly after.

## Any little girl can do the churning with MAXWELL'S Favorite Churn.

It makes the smoothest, richest, most  
delicious butter you ever tasted.  
The roller bearings—and hand and  
foot levers—make churning an easy task,  
even for a child.

All sizes from 10 to 30 gallons.  
Write for catalogue if your dealer does  
not handle this churn and  
Maxwell's "Champion"

Maxwell & Sons,  
St. Mary's, Ont.

## Living up to One's Bread-pan

The Pioneer Press some time ago told of a young woman who, having long been without a satisfactory bread-pan, was finally presented with one so fine and capacious that she laughingly questioned whether she would be able to "live up to it." What achievement in the art of bread-making might not now be expected of her, since she was the owner of such a pan! Her humor reflected a conscientiousness, and a sense of responsibility for the right use of opportunity such as, if it were more general, would tend powerfully to the social uplift.

A writer in the "Farmer and Breeder" tells of another young woman who, when a bride, found among her presents one of the very best modern bread-mixers. But she had always made bread in her dishpan, and went on doing so, although the bread-mixer would have done the work better and with less labor, and in one-fourth the time. Here, not conscientiousness, but a stout conservatism, prevented the young woman not only from living up to her opportunities, but from letting the light of what might have been a helpful counsel shine for the benefit of neighbors: who, like herself, were needlessly carrying the burden of an antiquated and laborious process.

When anyone is tempted to complain of the inadequacy of surrounding opportunities may it not be well to inquire whether he or she is really "living up" to such as are already in one's possession?—C. R. Barnes.

## Touching up the Home

It is astonishing how we impose on our patience and strength by neglecting things about the house, says a writer in the Canadian Home Journal. Creaky hinges, doors that latch and unlatch hard, catches that don't catch, loose handles, annoyances we notice every day, but never think of repairing unless some unusually provoking thing happens in connection with one of these little slipshod matters. A good plan is to go over the house periodically and remedy these matters—we will be surprised at the number of them.

For dresser and chiffonier drawers that stick, remove the drawer, turn upside down, and rub the bottom edges with soap. Rub the places where the drawers rest with soap also. If the drawer sticks because it is too close a fit, get some one to shave off a bit of the edge with a plane.

For creaking door hinges, apply a little vaseline with a duster. Sewing machine oil will do, too, or even olive oil, if there is nothing else handy.

Buy a small bottle of stain and a tin of white enamel, and touch up all the spots on the floor or door and window frames that have become marred. Take out all the unnecessary screws and hooks that mark the places where curtains used to hang.

If the wall paper is torn and the plaster is broken, fill the broken place with plaster of Paris, then cover it with a piece of plain white paper coming just to the edges of the torn wall paper. With the children's water colors paint the wall paper, and the place will never be noticed. Of course this is unnecessary if there are any left over pieces of wall paper at hand.

Replace all lost knobs and correct faulty catches on wardrobes and cupboard doors in particular. Doors which will not shut should be planed off at the top or bottom.

Window blinds that are worn and tacked on again, and a new hem sewn in the lower edge with the sewing machine.

See your friends about subscribing to Farm and Dairy.

## The Sewing Room

Patterns 10 cents each. Order by number and size. If for children give age. For adults, give height, bust, waist, and waist measure for skirts. Address all orders to the Pattern Department.

## GIRL'S ONE-PIECE DRESS 710

Dresses that are made in one piece in the sense that the bodice, waist and skirt portions are in one exceedingly smart and school girls' wear. For the coming season, real Scottish plaids will be much used as trimming on plain material. The skirt is cut in one piece with the collar and cuffs of plaid material. It is smart and durable. For the 10 year size, the dress will require 5 yards of material. For the 12 year size, 5 yards 1/2. For the 14 year size, 6 yards. For the 16 year size, 6 yards 1/2. This pattern is cut in sizes for girls from 6 to 12 years of age.

## FOUR-PIECE SKIRT, 787

Every variation of the over-lapped or envelope effect is exceedingly smart. This skirt is cut in one piece, so that there are only two seams to be sewed up. The remaining edges are finished and lapped over on the other side and the skirt is made invisibly. When cut in one piece, the skirt is finished and joined to the bodice. When cut in one piece, it is arranged on a fitted girder.

For the medium size, the skirt will require 5 yards 27 or 28 inches wide. For the large size, 6 yards 27 or 28 inches wide. For the small size, 4 yards 27 or 28 inches wide. The width of the skirt is 2 yards at the lower edge.

## SEMI-PRINCESSE GOWN FOR MISSES AND SMALL WOMEN, 738

Simple dress trimmed on graceful hanging. The entire possible toilettes all here in one of the very latest styles. The skirt is made of two pieces and a blouse is a plain white material. The trimming is a plain white material. The skirt is made of two pieces and a blouse is a plain white material. The skirt is made of two pieces and a blouse is a plain white material.

## For the 16 year size

the dress will require 4 3/4 yards of material 27, 4 yards 36 or 38 inches wide. For the 14 year size, 4 1/2 yards 36 or 38 inches wide. For the 12 year size, 4 yards 36 or 38 inches wide. For the 10 year size, 3 1/2 yards 36 or 38 inches wide. For the 8 year size, 3 yards 36 or 38 inches wide. For the 6 year size, 2 1/2 yards 36 or 38 inches wide.

## Great difficulty is often experienced

when cutting thin materials such as chiffon, net and maline. If the material is pinned to paper it will remain firm, and the trouble will overcome.

## A labor saver when basting

seams is to use the little wire clips to hold the material together, instead of sewing the seam the length. They will hold it perfectly even and will not fall out.
