

Many Farmers Erect Steel Truss Barns

Many farmers throughout Ontario have erected fine Steel Truss Barns this year and have mowed away their crops at less expense and with greater ease than in former years. The Steel Truss Barn has no cross timbers which does away with lifting loads to the roof before swinging it over the mow, and at the same time allows of one-third more storage space.

One of these Steel Truss Barns, size 36 ft. x 56 ft., will be shown, equipped with all sanitary Steel Stable and Barn fittings, at the Toronto Exhibition just east of the Poultry Building. Farmers will do well to pay a visit to this barn.

Having purchased SPRUCEDALE STOCK FARM, St. Thomas, Ont., I am going to transfer my 40 head of dairy thoroughbreds this week. I am still offering 27-year-old yearling heifers and young bulls for sale.

The market for the stock closed with a reaction of several cents, due practically altogether to the cancellation of orders by the allied powers. These orders may have been cancelled on the expectation that the Dutchards will soon be opened.

TORONTO, Aug. 23.—Crop reports from over Ontario have now taken on a more optimistic strain. The damage done by recent rains has not been so widespread, nor so severe, as was at first supposed. The losses will be sectional; in some districts there is a large crop, and in others practically nothing at all. In the total oat crop, it is estimated, will be much in excess of that of last year. As a result the price on old oats has been cut, coupled with further interference with harvest, the loss may be much more severe than present reports indicate. In the corn districts of south-western Ontario, seed corn may be almost no crop at all. The feature of the market in the past week has been the cutting of contracts for wheat by the allied powers, and the war wheat will prove down a quarter of a cent. Dairy produce is about the same with butter a little stronger and cheese a trifle weaker. Live stock have experienced a quiet week.
