

Dry, Tight Poultry Houses

Dampness and draughts are deadly to chickens. A dry atmosphere and an even temperature are absolutely essential to health and productiveness in poultry. Poultry houses roofed and sided with

REX FLINTKOTE ROOFING

have protection not only against wind and rain, but also against extremes of temperature, dampness and humidity. REX Roofing is a non-conductor of heat and cold as well as being storm-proof and wind-tight.

REX Roofing has great durability because it is made of dense, long-fibre wool felt, thoroughly impregnated with weather-resisting compounds. Any farm hand can put it on.

"Look for the Boy" on every roll and don't buy unless he's there. OUR FREE SAMPLES AND BOOKLET will convince you on every point of roofing excellence. Sent for the asking.

Hiding Facts With Talk

Only Sharples Cream Separators receive the unskimmed milk through the lower end of the bowl. This makes Sharples Tubulars much faster and cleaner skimmers than "bucket bowl" machines. Dairy Tubular bowls contain just one smooth piece—instantly removable and no larger than a napkin ring.

"Bucket bowl" makers have tried, without success, to overcome these great, patent protected Tubular advantages by persistently increasing or complicating the number of parts inside their "bucket bowls." For instance, the maker of the old disk style of "bucket bowls" now puts 40 to 60 disks in his bowl. Notwithstanding that these old style disk and other "bucket bowl" machines are more complicated now than ever before, the makers try to hide the fact by calling them "more simple than ever and easiest to clean." What do you think of it?

Tubular sales exceed those of most, if not all, other makes combined. The manufacture of Tubular Cream Separators is one of Canada's leading industries. Get catalog No. 193.

Dairy Tubulars run so lightly that the medium sizes are easily turned by one who is seated. That is because Tubular bowls are self-balancing, turn on a single, ball bearing and are driven by self oiling gears.

To Save Labor USE THIS

DAIN LOADER

MAKE Better Hay WITH THIS

DAIN Side Delivery RAKE

No pulling or tugging to drag the hay from the back end of the load if this Loader is hitched to your wagon, because the elevating bars push the hay forward on the wagon so one man handles the hay easily. The Dain Loader takes hay from swath or windrow. Two sets of self adjusting rakes having a long sweep over stubble gather hay clean, but do not disturb trash. The reciprocating bars elevate hay without injury to the tender

leaves because the self-expanding throat allows hay to pass freely onto wagon without wadding, tangling or jamming. An apron at top keeps hay from spilling or blowing off side of load. Wheels set underneath so it can be taken through gates and operated close to fences, can be coupled on without crawling under wagon, uncoupled without getting off load.

No ropes, cog gears, crossed chains, crooked crank shaft, or other traps to cause trouble, delay and expense. Simple in every respect, light draft and durable.

USE THE DAIN SIDE DELIVERY RAKE and have air cured hay. Such hay has better color, is sweeter, rich in natural juices and nutriment. Worth more to feed or sell.

It's a Tedder and Rake in one, more and better than either. The three sets of teeth on a slowly revolving reel gently deliver two swaths of hay upside down in a loose continuous windrow so that every bit is exposed. The teeth may be set forward out of plumb so fluffy windrows are made in heaviest hay. Spring-supported reel frame prevents jar and strain over roughest grounds.

These two tools are famous for saving labor and improving hay. Like Dain Mowers, Sweep Rakes, Stackers and Presses, they are made of highest grade guaranteed material and will stand severe use even abuse that would ruin ordinary tools.

We have specialized on building hay making machinery for over a quarter of a century and have a reputation for producing unequalled labor-saving, rapid-hay-handling, reliable tools.

Ask your Dealer to show you the Great Dain Line. Handy Reference Book "All About Hay" SENT FREE

"GALT" SHINGLES

This ingenious and yet simple and easy-fitting construction makes a "Galt" Shingle roof absolutely weather-tight. It prevents wind from driving rain or snow up and out of the top end of side lock, as so often happens with ordinary metal shingles. There is not even the smallest opening—this cannot be truthfully claimed for any other steel shingle.

The material is the Best British Galvanized Steel embossed in a bold Gothic Tile pattern—a thing of beauty and of joy forever. Catalog "B-3" gives complete details of this newest and best shingle.
