

## THE "NORTHEY" PORTABLE Gasoline Threshing Engine

This arrangement makes the neatest, strongest, most effective and economical THRESHING ENGINE yet placed before the farming community. The truck is strongly built, of the highest-class materials—will stand any amount of strain on rough roads, and possesses the distinct advantage of always being ready on waiting around to get started and manage it—neer, fire, boiler, dirt, etc.—and its action is run for hours at a time after. Absolutely safe—running expenses very exact proportion to

This is what Mr. Robt. Darling, Stuartburn, Man., writes us: "I have thoroughly tested the PORTABLE GASOLINE ENGINE No. 379 which I purchased from you some time ago. Have run a 23-inch circular saw, and it has given good satisfaction and runs splendidly. I cannot say too much about the 'LITTLE GIANT,' as I call it: it seems so neat and so strong. Many come to see it start, and every one has praised it and thinks it cannot be beaten. The engine runs my thresher to perfection—lots of power and regular speed, so necessary for a thresher. Yours truly, ROBT. DARLING."

The Waggoner Ladder Co., Ltd., London, Ont.

DEAR SIRS.—The fifteen ladders, ranging from 24 to 30 feet in length, with which I equipped three of my gangs who were picking apples this fall, gave the best of satisfaction. I am sure that with them the men were able to do fully one-third more work, and also to save at least ten per cent. of fruit on the high trees as compared to the old style of ladder, because, with no loss of time or knocking off of the fruit, the ladders could either be run up through the tree or put anywhere desired, and this without injury to the tree or fruit. My boss packers speak in the highest terms of the ladders.

Yours truly,  
C. W. SMITH, Apple Exporter, London.
