SACKVILLE AND WESTMORLAND AGRICUL-TURAL AND EMIGRANT SOCIETY .-- On Monday the 20th October the Members of the Sackville and Westmorland Agricultural and Emigrant Society held their Annual Cattle Show and Ploughing Match at Westmorland, and notwithstanding the day was unfavorable, there was a numerous attendance, and much interest was taken in the several exhibitions, which were highly creditable to the County.

The Show of Cattle of every description elicit-ed the approbation of all, and fully compensates the Society for the money it has appropriated, and the great interest it has taken in importing from England the most approved breeds. The following are the Premiums awarded to

the successful competitors, which were immediately afterwards paid by the Treasurer of the

-St. John, N. B. Courier, 22nd. THE WEATHER during the greater part of the week was frosty and winter like. Yesterday the wind changed to the Eastward, blowing violent. ly in the evening, accompanied for a time by snow. At night the wind changed to the Southward, and increased to a gale, accompanied by torrents of rain ; and this morning our streets are cleared of the ice and snow with which they have been covered for some days past. This fa-0 vorable change in the weather has reopened the 0 navigation to Oromocto, and will greatly facilitate the forwarding of supplies, great quantities of which remain to be conveyed up the River .-Two Steamers, bound up the River, started from 6 Indian Town this morning. A telegraphic despatch to the News Room, dated at noon to-day, states that the ice remained firm at Fredericton. but the River is open from the Oromocto down wards.-16.

CROPS. - The Quebec Morning Chronicle, says :- From all parts we have good accounts of the crops ; but with the exception of the potatoe we cannot say with any certainty what the result is, as the reports are various. From some localities the accounts are good, and from others bad .-There is a deficiency beyond doubt. There is former years, which we hear, is owing to the lateness of the harvest in many parts. — Farmers are commencing to thrash out their grain, and the yield is likely to be an average one

LAKE ST. PEFERS. - The Harbour Commissioners at Montreal have succeeded in dredging a ship channel at this locality, and the corporation of that city have selected the ship " City of Mun-chester " for the honour of first passing through 0 ii — the City paying all the expenses incidental to delay, &c. We observe, however, that Capt. Walker of the bark " Earl Powis " of Jundie, has addressed a letter dated Nov. 8, to the Editor 6 of the Quebec Chronicle, in which he says the 0 corporation has put the city to needless expense to celebrate the event, as the vessel under his command had the honour of being the first to pass through the new channel on the previous Fri-

dav 0 QUEBEC, Nov. 21 .- Wind East-snow falling 6 fast -- Thermometer four degrees below the freez ing point. There are eight or nine vessels still in

port, and four at Montreal. 5 P. M.—The storm here is terrific ; it is fear-0 -6 ed much damage will be done, especially among the small crait in the harbour. Snow still failing 6

last 0 MR. Serrell the Engineer who planned the celebrat d suspension bridge over the Niagara, is now in town making a survey, for the city Coun-O cil, with a view of ascertaining a proper site for 0 the proposed bridge in front of Quebec .- Quebec 0 Morning Chronicle 17th

## Newfoundland.

0 SIR GASPARD LE MARCHANT will return to Newtoundland previous to the opening of the 6 Legislature ; Earl Grey having requested him to all sown in this county : the s-eding we assume his position in that island for a funited the quantity of guano used is immense. period .- The Labrador trade and fisheries are 6  $\mathbf{5}$ 0 THE weather continued favourable and presented a beautiful autumnal appearance. Many 6 of the flower-gardens were rich in loxuriance and perturne, and the kitchen garoens still supplied 6 vegetables in profusion. The crops had all been gathered in and housed; the whole with the exception of the potatoe are good; the latter a 0 complete failure. THE Express announces that " Mr. Cunard 0 has purchased a steamer called the Lerantine, for the Mail picket service. She was expected to leave the Clyde about the 1st. Nov., and will pro-bably be placed on the Halifax and Bermuda 0 route, to replace the Ospray, to be transferred to 6 the Halifax and Newfoundland line." 0 THE committee appointed for the promotion of Steam Navigation direct to this port from the other side of the Atlantic are in a' fair way of see 0 ing the accomplishment of that object at no very 0 distant period of time. It appears that Messrs. Brooking & Co., of London who had been authorized to advertise the offer of our local Government of £1000 per annum for three years, to any Company who should first run a steamer between the UnitedKingdom and the United States, making this har-6 bour of St. John's a port of call, have received a proposition from some eminent engineers to the effect that they would construct two steamers of 250 to 300 horse power each, to run monthly, from Liverpool to New York and back, taking the ports of Galway, and St John's, Newfound land ch route each way, if the annual grant from the Government should be increased and made to extend over a greater number of years .- St 5 0 John's N. F. Ledger.

Kossurn-A despatch from Washington states that the President will give Kossuth, soon after his arrival, a grand diplomatic dinner, to which the Chevalier Hulsemann, the Austrian Minister will be invited.

6 6 for them will be great.

CALIFORNIA - The amount of gold which is now being taken out on the Yuba and Feather Rivers is unusually large. In the neighborhood of Downieville, the diggings are what would have been called good even in the best days of gold discovery.

The San Francisco correspondent of the Journal of Commerce writes.

A few days since I had the pleasure of meet. ing with a gentleman just down from the mines, who with three others, had been for muste in taking out the enormous sum of \$35,649 in three days, from a place called "Yankee Side," on the American river. He told me that nature had changed the course of the river at that point, and after working three weeks in removing the dirt which had thus been washed into the original bed of the river, they succeeded in finding one lump of pure gold weighing 252 ounces, which, with other small pieces. They collected, in all, within three days time, the sum as before named of thirty five thousand six hundred and forty dollars.

Business in Oregon is reputed brick. More gold has been discovered in Oregon, in the vicimity of the Siddle mountain, which is plainly seen from almost any point near the mouth of the Columbia, it being about fifty miles south of Astoria.

A valuable coal mine of anthracite coal has been discovered in Charles River, about four miles from Astoria.

at San Bernardino, in Los Angeles county. They are about to build up-a city at that point, which is expected to contain six thousand inhabitants. in six months. They are talking about a railroad from Great Salt Lake City to that point.

END OF THE NORTHERN MEXICO REVOLUTION. -By an arrival at New Orleans, yesterday, we have advices from Northern Mexico to the 9th inst, on which day General Caravajil raised the America vist herds of citile are annually siege of Matamoras, and disbanded his revolutionary followers.

NICARAGUA .- A passenger from Nicaragoa, by the Daniel Webster, reports that a battle had by-Professor Stone, on the Victues of Phosphate been fourth between Gen Munez, the leader of of Lime in Scrotula, embodying the conclusions the revolutionary party, and the government of an article in the London Lancet. He concludes forces, and that the former had been captured, that miny of the diseased states of the system and his adherents despersed. The General was arise from a deficiency of this salt -- such as msubsequently released upon promising peaceable conduct, which promise he had violated, and -particularly of the lungs. He has tested the with 150 followers was again in arms against the theory in practice. He details three cases, in government

THE CAPITAL OF CALIFORNIA has recently been removed, by order of the government from Vallego to San Jose, the former seat of government This was done in consequence of noncompliance with the bonds of Gen. Vallego, as is allegid, which were taken at the time of the removal.

APPOINTMENT BY THE PRESIDENT - W. L. Sharkey, to be Consul of the United States at Havana, in the Island of Culta, in place of Allen F. Owen, recalled.

The Rockville Journal says :- The wheat is all sown in this county : the s-eding was heavy ; ternoon, as the Mo ris and Essex Railroad train

claiming attent on from a portion of the press, Buckeye State took fire this evening, about half- vered lying or crawling on the track. A large and complaints are loud in reference to d salvan-past 8 o'clock, as she was about to leave for Newfoundland dog, belonging to James Bishop tages under which Newfoundland labours con-Cleveland, having on board a heavy cargo, and Esq., rushed forward, and seiging the child, board 200 passengers. It is supposed the fire origination it to a place of safety, the locomotive almost ed from the pipe igniting the wood work under grazing the dog. the deck The fire spread very rapidly, and the vessel was immediately scuttled, but d d not sink owing to the shallowness of the water. The damage to the boat is about \$12,000, which is insured. A large amount of property belonging to the passengers and consignees was also destroyed.

## NOVEMBER 29.

at Metamoras. Gen. Unaga had been appointed to the command of 5,000 men, with whom hein tends marching to the seat of war, for the purpose of quelling the insu-rection.

THE MEXICAN TABLEF -- The Mexicon govern ment has re-established the law which provides that all foreign articles imported into Mexico shall pay a duty of eight per cent. The articles are at no other time to be subject to any state or the vote for a free banking law in Illinois has national impost. The general government, and the or best of the solution of th equally share the proceeds between them, -- and other States shall be credited duly with their share The law is to take effect in four mouthe from the 9th of October.

## MISCELLANEOUS.

PROFESSOR GORING.-This gentleman, who is professor of natural history at the University of Lodi, made before a circle of private friends, two nights ago, a very remarkable experiment illustraive of his theory as to the formation of montrins. He melts some substances, known only to hunself, in a vessel, and allows the liquid to coul. At first, it presents an even surface, but a portion continues to ooze up from beneath, and gradually elevations are formed, exactly corresponding in snape with those which are found on the earth --Even to the stratification the resemblance is complete, and M. Gorini can produce on a small scale the phenomena of volcanoes and earthquakes the contends, therefore, that the means. ties on the face of the globe are the result of cer. trin materials, first reduced by the application of heat to a liquid state, and then allowed gradually to consolidate. In another and more practically useful field of research the learned protessor has developed some very important facts. He has succeeded in a most surprising extent in preserving animal matter from decay without resorting to any known process for that purpose. Speci mens are shown by him of portions of the human body which, without any alteration in their nataral appearance, have been exposed to the action The Mormons have recently made a settlement of the atmosphere for six and seven years; and he states that, at a trifling cost, he can keep meat for any length of time, in such a way that it can be eaten quite fresh. The importance of such a discovery, if on a practical investigation it is

found to answer, will be more readily understood when it is remembered that the flocks of Austrialia are boiled cown into tallow, their flesh being otherwise almost valueless, and that in South slaughtered for the sake of their hides alone. A NEW CURE FOR CONSUMPTION is approunced. The New Orleans Medical Register has an article

fantile atrophy, rekets, and tuberculous diseases which he had complete success.

The second case is that of a young lady, aged twenty four Her disease was one of "unmixed phthisis, which might have been expected to terounsite in the course of a few months'' fatally .--The upper part of both her lungs was filled with tubercles, and in some places were beginning to soften The case was evidently a had one. The treatment of cod liver oil was at first used, but without marked improvement. The phosphite of lime was then administered with the oil, and the result was soon apparent. The patient was rapidly getting well.

EXTRAORDINARY SAGACITY .- On Sunday afwas returning to Newark, N. J., when within BUTFALO, Nov. 10 .- The magnificent steamer about one mile of the deput, an infant was disco-

Advices from Port au Prince state that the Emperor Solouque had complied with the de- ed with unabated fury till the following morning mands of the American, French and Euglish at 8 A. M. The wind raged with most fearful Consuls, and had concluded the truce with the violence, and the rain poured down in torrents, Dominicans, by the term of which a years notice must be given of the renewal or hostilities. This and wharves The tide also rose to a very extrawill tend greatly to enhance the prosperity of the island. Coffee was selling at \$35 per hundred, be so high in Halitas before, and as may be supwith a prospect of a large crop.

House of Representatives had elected Rosas Em- one sunk at Noble's wharf, and another at the peror for life, and denounced Oribe as a traitor. The U.S. ship Jamestown, from Montevedio, with Commodore McKeever on board, had arrived at Buenos Ayres, and reports that Oribe was still endeavoring to make terms with the Brazilians and Urquiza. It was the general opinion at Buenos Ayres, that if Oribe failed to make terms and was obliged to fight, his army would be destroyed.

FROM TEXAS-THE MEXICAN REVOLUTION .-NEW ORLEANS, Nov. 12 .- The steamer Louisiana has arrived, with Galveston dates of the 7th All the Mexican troops except 10, stationed at Ringgold Barracks, had deserted to the insur gents. The Mexican forces were concentrating Her Majesty to the rank of Colonel .- 16. 26th.

## DOMESTIC.

SEVERE GALE, - A very severe gale of wind, ecompanied with heavy torrents of rain, passed over this city on Friday night last, and continuordinary height, in fact it never was known to posed, it did considerable damage. A great deal Advices from Buenos Ayres also state that the of injury was done to some of the vessels in port. Queen's wharf, and several others lost their bowsprite, &c. The barque Prince Arthur was driven toul of the brig Commerce, lying at Fairbanks & Allison's wharf, and ripped her stern completely open. Several small craft drifted up the Harour .- Accounts have been received that several of the Fishermen have lost a considerable amount of property by the gale, particularly those on the western part of the coast. We sincerely condole with those who had the misfortune to lose their property by the gale .- B. N. American, 24th.
