The Oliver Line Has the Plow for You

OLIVER plows led the rest as long ago as the "50's" in the last century. Ever since they have been kept at the top level, building up plow confidence in the farmer. These words are to remind you that Oliver plows are, as usual, the latest and best, improved types, of great strength, light draft, of close adjustment, and easy to operate.

Oliver Improved No. 1 Gang should have your close study — it is the important plow for the coming season. It is shown here. You will need our new catalogue to appreciate its many good points — these for example: The beams are landed, distributing the pull equally on both beams, avoiding twisting strains, making plow steadier, giving more room for horses to walk abreast. The lift device, quick and powerful in action, raises plows or forces them into hardest ground instantly. Perfectly straight furrows and straightening of crooked furrows insured because rear wheel is free to cast and to follow absolutely the landside, even though the tongue is turned to extreme right or left. The front wheel support is exceptionally strong; the bar steel frame is double, and a bracket reinforces the frame. The rear furrow wheel is made to resist extreme landside pressure. It is made with a wide adjustment right and left to hold plows in position under all frame wear and strain. The Oliver No. 1 gang is more satisfactory than ever before.

For every buyer there is the right plow in the Oliver line. At your disposal are Oliver sulks of several types, walking plows, disk gangs, breakers and cultivators. Oliver — a plow for any soil and any sized farm, as successful as they have been for many years. Write to the nearest branch house for full particulars about any style.

The Power Behind the Profitable Farm

Farmers to-day have the best chance ever to make money—if they can only solve the labor problem!

Here's where the TORONTO Gasoline Engine comes in. It handles an end of heavy work around the barn and house, and does it far cheaper than hired men—even if you could get them. From grinding, driving the straw and hay cutter, filling the silo, pumping water and sawing wood, down to running the milker, the separator and the grindstone, it will do so many hard, tiresome jobs that you'll wonder how you ever got along without it.

TORONTO ENGINES

give particularly good satisfaction because they are so simple and adaptable. Our illustrated booklet shows that there is nothing complicated about them to be figured out, tinkered up or referred to experts—nothing likely to get out of order and tie up an important job. They start easily and run like clockwork, at a speed that can be controlled within wide limits while they are running.

Battery or Magneto Ignition—Gasoline, Kerosene or Natural Gas Fuel. Made in five sizes—1 H.P., 2 H.P., 4, 6 and 8 H.P. Trucks furnished if desired. Full descriptions, specifications and shipping weights are given in our new illustrated Catalogue, with valuable hints on using power instead of labor, to advance and profit. Write and we will send you the Booklet promptly.

We also manufacture Windmills, Pumps, Etc.

FREE Registered POTATOES

Offer Still Open

Good potatoes for seed are a very expensive article this year. Ordinary potatoes are selling on the Winnipeg market at \$1.50 a bushel. The Guide has been fortunate in securing a limited quantity of registered seed potatoes. We have for distribution "Table Talk" and "Irish Cobbler." These registered seed potatoes if bought on the market would probably cost you from \$3.00 to \$3.50 per bushel. Both varieties have been grown under the rules of the Canadian Seed Growers' Association and are registered stock, which means that they are the very choicest and best quality seed. Every tuber is perfect, and none of them weighs more than six ounces nor less than three ounces, and they are absolutely free from all spots, scabs or disease of any kind. Any person who secures either of these varieties will be entitled to use them as foundation stock for producing registered seed, and can join the Canadian Seed Growers' Association. "Irish Cobbler" potatoes are excellent cookers, they mature later than most varieties, their keeping qualities are good, and at the Provincial Fair at Saskatoon, in January, "Irish Cobbler" took first prize as an early white potato. "Table Talk" is a smooth white potato with shallow eyes and an excellent cooker. As a table potato it has no superior, and it always brings a good price on the market.

Our "Table Talk" potatoes will be put up in one and a half bushel sacks, and "Irish Cobbler" in one bushel sacks. In both cases the sacks will be sealed with the official seal of the Canadian Seed Growers' Association.

We have only a limited quantity of these potatoes, and those who wish to secure some of them will need to act quickly. We are giving these potatoes away to any person who will collect a few subscriptions to The Guide in their own locality. Any person who will collect four yearly subscriptions to The Guide, new or renewal, at \$1.50, and send \$5.00 in cash to The Guide office, will be entitled to one and a half bushel sack of "Table Talk" or a one bushel sack of "Irish Cobbler" potatoes, or if you can collect any two-year subscriptions at \$3.00, we will count them the same as two one-year subscriptions at \$1.50. Your subscriptions may be sent in all at one time or at different times.

With the price of potatoes steadily advancing there is no doubt that the demand for this registered seed will be tremendous and that our small supply will soon be exhausted. If you want some of these potatoes, get your subscriptions in at once.
