WOMAN'S PLUCK WINS

A Lady Who Cured Her Husband of the Liquor Habit Writes a Pathetic Letter.

determined to make an effort to save online home from the ruin I saw coming, at all home from the ruin I saw coming, at all the saw coming. I sent for your Samaria Prescription and put it in his coffee as directed next morning, and watched and prayed for the result. At noon I gave hit, more and also at supper. He never suspected a thing, and I then boldly kept right on giving it regularly, as I had discovered something that set every nerve in my body tingling with hope and happiness, and I could see a bright future spread out before me—a peaceful, happy home, a share in the good things of life, an attentive, loving husband, comforts, and everything else dear to a woman's heart, for my husband had told me that whiskey was vile stuff and he was taking a dislike to it. It was only too true, for before I had given him the full course he had stopped drinking altogether, but I kept giving the medicine-till it was gone, and then sent for another lot to have on hand if he should relapse, as he had done from his promises before. He never has, and I am writing you this letter to tell you how thankful I am. I honestly believe it will cure the worst cases."

GLASSE: FOR THE EYES

The Reason They are Worn by so Many People Nowadays.

Great Many New and Recent Inven

The question is often asked, particularly by those who can recall the customs and experiences of 25 years ago "Why do so many persons nowadays wear glasses?" The answer is easy. "The increase in the number of spectacles worn is not to be regarded as an evidence of modern degeneration of the eyes, but rather that a long felt necessity has been met." For it should be remembered that within the past quarter of a century much has been learned about the value of glasses, and the range of their application and use fulness has been enormously extended. Of course the eyes need more help now than formerly, as the amount of work they are required to do is much greater than at any previous period in the world's history. The sewing machine and many other inventions of its class save the labor of the hands only to

add to that required of the eyes. New employments, new amusement and new fashions are continually be ing introduced to increase the exac tions laid upon these sensitive and delicate organs. The steady decreas of illiteracy, together with the general cheapness of literature and a spread of a taste for it, the enormous circulation of novel, magazine and newspa per, the ever increasing use of artificial Illumination, all combine to overtax the eyes and to weaken or possibly d stroy the sight unless the required aid and protection be supplied through every means at our disposal. Thus it happens that the some time luxury of properly adapted glasses has come to be recognized and understood by very many of the present generation as one of the real necessities of their lives .-Lippincott's.

PORTER AND COBWEB.

The Professor Kept his Eyes on One in the Room

Meantime the Boys did as The Pleased and Neglected Ther

The late President Porter of Yale was very broad and generous in his classes and rarely found fault with his boys. One of his habits in the classroom was to keep his eye fixed all the time he was talking upon a big cobweb in the left hand corner of the room. Meanwhile

the boys did as they pleased. Professor Ladd grieved at this lack of respect and one day conveyed to the president as delicately as he could the fact that the boys were abusing his kind-

"They are studying other lessons in your classroom instead of listening to

you," he said.
"Is that so?" returned the president musingly. "I understand that they do not study in or out of some classrooms." And to the day of Dr. Porter's death Professor Ladd never knew to which classroom he referred, but the subject of cobwebs was permanently dropped.-Saturday Evening Post.

The Scotch Canadians.

"The Scotch Canadians of the present day," says a Montreal correspondent of The Catholic Standard and Times, "be-The Catholic Standard and Times, bu-long to Clan Prosperous. In actual num-bers they form but one-twentieth of the population of Montreal, yet they own one-fourth of the wealth of the city. Their castles on the mountain and their mansions on the Rue Sherbrooke are sights to see. Judging from the business signs one might fancy that the city is within a mile o' Edinboro town. The deadly practical branch of the Gaelic deadly practical branch of the Gaelle race certainly has a leonine share of the prosperity to which it has contributed its quota. The long headed, farsighted Scotch make solid citizens wherever they go, and they have helped to make Montreal a solid commercial city."

"Oh, Major Blower! Is it true you once ran an Indian to death?"
"It is quite true, miss."
"And how far did the Indian run?"

"I cannot tell you. I was looking straight ahead all the time until I got back to comp."—Omaba World-Herald.

BEGGAR'S RECEIPTS.

Ten Dollars an Bour the Estimated Income of a Legless Man

Realistic Anecdote That Shows That Charity is not Dead in New York

Charity is not dead in New York. Any one with doubts on the subject would have been convinced had he seen a richly dressed woman drop a quarter into a beg-gar's box the other afternoon and noted the things which followed on Twenty-

third street. The beggar was in the middle of the block, moving slowly toward Sixth avenue. He moved on stumps tuly about eight inches long. There was something plaintive in the short steps he took and in the way he rested for a moment after each, like a tragedian crossing the stage. A second woman stopped and threw a dime into the wooden receptable for coins. A third instantly followed suit.

The beggar was stout and burly. His neck was thick and powerful looking. It should be so crippled.

A poorly dressed woman and a little girl paused long enough to pity him and add their mites to his assets.

The beggar was laboriously pushing a little four wheeled cart. In it was a hand organ, which he ground unceasingly.

A shabbily dressed man paused to pay a cash tribute to the beggar's misery.

Sentimental strains poured from the hand organ. The time was very slow. There was nothing gay about that music It almost drew tears from the eyes of the Three prosperous looking women opened their purses and dropped silver into

the box. rate of 24 feet a minute, and the contri

rate of 24 feet a minute, and the contributions fell at the rate of one in every four yards. The man with the rubber snakes, the man with the toy balloons, the man with pictures of the Dewey arch, the banana man and the vender of hot chestnuts, looked on with bulging eyes.

"My, what a graft!" they murmured.

The organ man looked very weary and rolled his head from side to side, as if life were indeed a burden. And the rain of money continued. The thirty-eighth contributor within 18 minutes was a well dressed youth. Above the organ was a dressed youth. Above the organ was a banner upon which was inscribed, "Ladies and gentlemen, having lost both of my legs and being unable to obtain em-ployment, I have taken this means to gain support for myself and my family and to raise money to buy a pair of arti-ficial feet." This appeal fairly magnetized the dimes. A cabman standing by the curb ran forward and dropped some-

"Poor chap," he said, "it's a hard thing to be like that."

"My friend," said a bystander, "that man will make more money in half an hour than you will in a whole day." man will make more money in and an hour than you will in a whole day."

The beggar and his organ had reached Sixth avenue. He had gone 180 yards from the point at which he was first observed. It had taken him 25 minutes. During that time no fewer than 50 people had dropped money into his box. Most of the contributors were handsomely dressed women. Doubtless some of them contributed quarters. It is likely that the contributions averaged 10 cents each, and if that was the case the beggar cleaned up \$5.90 while going half a block, but in case some of the women put in only pennies it might be well to call it \$5 for 25 minutes, or say \$10 an hour.

"That one box you see," said a special officer. "is only one of his boxes. He has three like it, one under the other. When the money partly fills one, it drops into the others."

But the beggar was out of sight. He

But the beggar was out of sight. He had gone to conquer another world west of Sixth avenue.—New York Sun.

Statistics are the pedantry of experience, not its wisdom.

Parties group themselves as much by their common dislikes as by their mutual affinities.
