

SPRING MEDICINE.

It is Absolutely Necessary to give some Attention to the Blood at this Season. In the springtime the blood needs attention. The change of the year produces in everyone, whether conscious of it or not, some little heating of the blood.

Some people have pimples, a little eczema, or irritation of the skin; others feel easily tired and depressed and have a poor appetite. A tonic is needed, and the best tonic, the best spring medicine for man, woman or child is Dr. Williams' Pink Pills for Pale People.

Remember that pink-colored pills in glass jars, or in any loose form or in boxes that do not bear the full name "Dr. Williams' Pink Pills for Pale People" are not Dr. Williams'. No one was ever cured by a substitute. Sold by all dealers or direct from the Dr. Williams' Medicine Co., Brockville, Ont., at 50c a box or six boxes for \$2.50.

Practicing. What was Christ doing in the carpenter's shop? Practicing. Though perfect, we read that he learned obedience and grew in wisdom and favor with God. Do not quarrel, therefore, with your lot in life. Do not complain of its never ceasing cares; its petty environments, the vexations you have to stand. Above all do not resent temptation; do not be perplexed because it seems to thicken round you more and more, and ceases neither for effort, nor for agony, nor for prayer.

Fountain of Health and New Life.

Paine's Celery Compound is the Mightiest and Most Effective of all Known Spring Medicines.

'Tis an Eminent Physician's Prescription.

Edward E. Phelps, M. D., LL. D., a leading professor in the celebrated Dartmouth Medical College, first prescribed what is now known in every home of the civilized world as Paine's Celery Compound, a positive cure for the common ailments and diseases of spring, such as blood troubles, kidney and liver complaints, dyspepsia, nervous disease, neuralgia and rheumatism.

As a spring medicine, Paine's Celery Compound now occupies first place in the estimation of medical men. It has been tested by members of the profession in cases where ordinary prescriptions have failed, and in every case the wonderful compound has maintained its claims and banished disease.

The action of Paine's Celery Compound on the nervous system in spring time is marvellous in health producing results. It quickly purifies the vitiated and impure blood, braces the nerves, rebuilds the tissues, adds to flesh and weight, increases the appetite, augments the powers of assimilation, and keeps the whole digestive or assimilation in proper repair.

Paine's Celery Compound has done a grand work for millions in the past. Surely this is the best guarantee for those who are now ailing and physically broken down. Every city, town and village in this vast Dominion can furnish its proofs of the virtues of Paine's Celery Compound—well attested cures.

A few bottles of the great spring medicine used at this time will give to every man and woman the blessing they are so earnestly seeking—true health.

A Gladstone Anecdote. A fellow of an Oxford college tells an anecdote about Mr Gladstone's visit to the college in question when he was staying in Oxford for the last time, in 1892. He had been dining in hall, and afterward attending common room, which was just over, most of the company having dispersed. The distinguished guest was standing with his back to the fire narrating some reminiscence of his university days. "Yes, sir," he was saying, "I set my eyes on him then for the first and last time, and that must have been—let me see—fully 60 years ago."

At this point a young man who was sitting at the corner of the fireplace and was afflicted with a cold happened to cough slightly. Instantly Mr Gladstone wheeled about, and making a courteous bow, said, with his usual emphasis: "Thank you, sir, thank you. I am obliged to you for that correction. I did exaggerate the lapse of time, I have no doubt. I should have said 60 years or 55 at the outside."

THE WHITE RIBBON.

"For God and Home and Native Land." Conducted by the Ladies of the W. O. C. T. U.

OFFICERS. President—Mrs Trotter. Vice-Presidents—Mrs Hempen, Mrs Chambers. Vice-Pres. at Large—Mrs Jaber. Recording Secretary—Ernie Bishop. Cor. Secretary—Mrs McKenna. Treasurer—Mrs Forsythe. Auditor—Mrs Roscoe.

SUPERINTENDENTS. Evangelistic Work—Mrs Kempton. Press Work—Mrs Borden and Miss Randall. Literature—Mrs Davison. Systematic Giving—Mrs Fitch. Flower Mission—Miss L. Johnson. Narcotics—Mrs Newcomb. Health, Heredity and Social Party—Mrs Hatch.

Next meeting in Temperance Hall, Thursday, April 27th, at 3.30 P. M. The meetings are always open to any who wish to become members. Visiting members of other W. O. C. T. Unions are cordially welcomed.

Bread and Bread-Making. PAPER READ BY MRS BEARS AT THE MONTHLY MEETING, MONDAY, MARCH 30TH, 1899.

Wherever we find man we have bread in some shape or form. It is one of the earliest as well as the most important food for mankind, and in some variety forms the foundation for the food supply of all people.

The fact that grains are so well fitted for food, and that they are so easily prepared, accounts to some extent for the general use of bread. The crusty cake of Scotland, the black bread of Russia, the rice cake of the Chinese, the perfect French bread, as well as the hoe cake of the south and the rye and Indian loaf of New England," each forms a staple article of diet in its respective locality.

With good bread the plainest meal is a feast, and the most elaborate menu is unsatisfactory if good bread is not supplied. Bread is one of the most complicated as well as the most simple article of food to prepare.

It is said that the Centennial Exposition and the introduction of Vienna bread did more to raise the standard of bakers' bread in the U. S. than anything else. Up to that time, much of the bread found in hotels and restaurants was a light, chaffy article, smelling of yeast and containing many injurious substances.

The only ingredients needed for making the very best of bread are—water, milk, flour, yeast and salt, and yet, because of the very simplicity of the task it seems to be a mystery. Oftentimes we hear one say, "My bread is a failure, to-day. I don't know why." Thus we hear of the trials of people over the task of bread making and we read of the perplexities of others. In Froude's Life of Thomas Carlyle, Mrs Carlyle tells her own story of her experience with her first loaf of bread. Now, because she knew nothing about the fermentation of bread and the heat of the oven required to bake it, she sat up all one night watching a loaf which after all didn't turn out to be very good bread, either. The task is worth mastering, so thought Mrs Garfield, who once found that she must make her own bread, as she was living in the country where good bread could not be obtained. She decided that if bread she must make, she would make the best bread in the village. Thus by attaining perfection her task became a pleasure rather than a disagreeable duty.

Many grains are used for making flour, and all of them are used to some extent for making bread. Flour made of wheat is most commonly used. It is said that wheat will sustain life longer than any food except milk, because it contains in the right proportions those elements best suited to the growth of bone, muscle, nerve and flesh. For this reason bread made of wheat ranks first. Wheat is an annual grass. Its origin is not known. It is cultivated to a great extent in the northern countries and is the grain which contains just the right amount of gluten for the making of good bread. The wheat grain has several coats. The outside coat is almost pure silica and is entirely indigestible; underneath this lie the inner bran coats, containing the gluten, which is a dark substance and a flesh forming element. Oils are found in the bran coats, as are also many minerals which are important in building up the bones. The centre of the grain is almost entirely starch, which is a heat producer but not of much value as food. The amount of these elements found in wheat varies greatly and depends upon the soil and climate where grown. Wheat grown in warm climates contains more nitrogen than that grown in cold countries.

Cutmeal cannot be made into a raised loaf as it lacks gluten. Oatmeal is too dry and bread made from it is dry and crumbly. By adding a certain amount of wheat flour to these, good bread may be made.

It makes little difference what sort of bread is made so it is good bread. What are the requisites of good bread? They are not many but they mean much. First bread must be light, second sweet, third tender. If any one can give definite directions so that these results may always be secured he will benefit mankind more than in any other way.

In the first place the materials which are to be used in bread making must be the very best. There is no economy in using poor, cheap flour. There are many tests for good flour. It should not be lumpy or gritty, but such as when pressed in the hand retains the impression. Different flours need different management.

Continued next week.

Scraps for Odd Moments.

The man with two many irons in the fire is sure to take one by the hot end.

He—What a perfect fool I've been! She—My dear, don't be so conceited; no one is perfect.

Why is a grain of sand in the eye like a schoolmaster's cane? Because it makes the pupil smart.

"What's the matter, bub?" "I lent Willie Jones my new skates, and he's gone an fell in his hole wid 'em."

"Isn't that a fire alarm bell that's ringing?" "Well, I should say not. That's the bell of the Universalist church."

Minards Liniment cures Diphtheria. Sutor—Your daughter, sir, is the light of my existence.

Her Father—Oh, that's it, eh! I've often wondered how you could ever see her with the gas turned so low.

"And you wouldn't begin a journey on Friday?" "Not I." "I can't understand how you can have any faith in such a silly superstition." "No superstition about it. Saturday's my pay day."

Bramble—The play was wonderfully pathetic. Thorne—Not a dry eye in the house, I suppose.

Bramble—Not one. Even the seats were in tears.

Minards Liniment cures Colds, etc. Dotting Mamma—Rodney, dear, to-morrow is your birthday. What would you like best?

Rodney Dear (after a brief season of reflection) "I think I'd like to see the school house burn down."

"That boy of mine," remarked the proud parent extravagantly, "is the genuine article. He's all wool, you can bet."

"I should'a wonder," commented old Grumpy, "I notice that he shrinks from washing."

Willie's Mother—"Your hair is wet, Willie. Where have you been?" Willie—"In the pond, mamma. I jumped in to rescue little Tommy Squeakers from drownin'."

Willie's Mother—"My noble boy! Was Tommy in swimmin'?" Willie—"No'ma. But he was going to go in."

Minards Liniment cures Dietspore. Editor—"Jim, I understand that old steeple building at the crossroads is to be torn down."

The Printer—"Yep. They begin to-morrow."

Editor—"Well, just slip around and put a live toad in the wall. We must have something to fill up with this week."

Tender-hearted One—Ah, my good man, yours is indeed a sad case! But adversity tries us all, you know, and reveals many of our good qualities.

Beneficial One—Oh, but it's adversity that tries me, mum! "I were a city magistrate, and he didn't put himself to no inconvenience about me good qualities, you bet, mum."

Minards Liniment cures Garget in Cows. Mrs O'Hare—"Faith, it's an illeggal job me husband's at now, Mrs McClane. 'Tis a sight watchman he is."

Mrs McClane—"And how in the world do you call that an illeggal job, Mrs O'Hare?"

Mrs O'Hare—"Why, sure he sleeps all day, and that cures his board; and he works all night and tust saves his lodgin'."

Warnings. Don't neglect your family in order to pose as a public benefactor.

Don't sit down and wait for a good job to come along and hunt you up.

Don't talk too freely when you don't know what you are talking about.

Don't quarrel, but if you must quarrel don't quarrel with your bread and butter.

Don't neglect to keep your shoes polished. You can always shine at one end if you can't at the other.

GENTLEMEN.—While driving down a very steep hill last August my horse stumbled and fell, cutting himself fearfully about the head and body. I used MINARD'S LINIMENT freely on him and in a few days he was as well as ever.

Sherbrooke. J. B. A. BRACHEMIR.

His Only Way. At a certain local police station a great hulking tramp walked in to ask the sergeant in charge of a night's lodging. Not satisfied with the refusal he received he still persisted. The sergeant soon lost patience, and said, "No one can sleep here unless he has committed some offence." "Is that so?" said the tramp, "that's pretty; but I suppose I can't help it. How will this answer?" with that he shot out his fist and knocked the sergeant down. "I hope I didn't hurt you more than necessary," he said, as his victim slowly picked himself up. "Give me as good as you have, for I'm tired and want to go to sleep." The tramp got his rest, and the sergeant was the butt for jest for many a day.

Experience in England. Diamond Dyes Have First Place in the Old Land. A Hamilton Lady Says: "Diamond Dyes Are Far Above All Others."

1898. THE YARMOUTH STEAMSHIP CO. (LIMITED)

The Shortest and Best between Nova Scotia and the United States.

THE QUICKEST TIME, 16 to 17 hours between Yarmouth and Boston.

2 - TRIPS A WEEK - 2 The Fast and Popular Steel Steamer "BOSTON."

UNTIL further notice, the above steamer will leave Yarmouth for Boston every Wednesday and Saturday Evenings after arrival of Express Train from Halifax. Returning leaves Lewis' wharf, Boston, every Tuesday and Friday at Noon.

making close connections at Yarmouth with Dominion Atlantic and Coast Railway for all parts of Nova Scotia.

This is the fastest steamer plying between Nova Scotia and the United States and forms the most pleasant route between above points, combining safety, comfort and speed.

Regular mails carried on steamer. Tickets sold to all points in Canada, via Canadian Pacific or Central Vermont and Boston and Albany Rys, and to New York via Fall River Line, Stonington Line, New England and Boston and Albany Rys.

For all other information apply to Dominion Atlantic, Intercolonial, Central, and Coast Ry agents, or to W. A. CHASE, L. E. BAKER, Secretary and Treas. Manager, Yarmouth, Oct. 20th, 1898.

DR. BARSS, Residence at Mr Knowles', Cor. Acadia street and Highland avenue; Office over E. J. Porter's store.

OFFICE HOURS: 10—11, a. m.; 2—3, p. m. Telephone at residence, No. 38

FRUIT TREES

At Wholesale in Lots of 100 and Upwards.

During the Xmas holidays I visited the Nurseries of Ontario and selected at Grimsby, and two other points near by, a car lot of (10,000) ten thousand, consisting of Apple, Pear, (Dwarf and Standard) Plums, Cherry, Peach, Quince, Currant, Gooseberry, Raspberry, Blackberry, Grape, Strawberry plants, Lawn shrubs, Street Trees, also 1000 Rose 2 years on own roots, all of which will be dug in the spring and are first-class.

I am setting a Fruit Park in the spring of 1899 acres. This entire lot of trees will be distinguished before shipment and guaranteed "clean." They will be packed in moss in car without boxing, and freight rates will be reduced one half. Trees are scarce this year. I now offer a part of the above to large planters, dealers or clubs at wholesale prices where orders are sent in without solicitation. Send list of requirements for quotations. I will print a sheet list of varieties.

Address W. G. ANSELBARD, Earncliffe Gardens, Wolfville, N. S.

THE ULTIMATE SUCCESS

of the treatment of Consumption depends altogether on the strength of the patient. The diseases of the lungs might be cured a great many times if the system had the strength to cast off the poisons, and to bear up under the strain of the cough.

PARK'S PERFECT EMULSION

of Cod Liver Oil with Hypophosphites and Gualico renders this possible. It begins by building up the system, correcting and improving the digestion, and gradually eradicates the disease. It tones up the entire body and enables the patient to take on firm, healthy flesh, and strength.

Park's Perfect Emulsion is composed of the purest Cod Liver Oil combined with the chemically pure Hypophosphites and Gualico, a combination that is being universally prescribed by the foremost medical men of nearly all countries for the treatment of all pulmonary diseases.

It is prepared in such a way as to entirely eliminate all bad taste or odor, and can be retained by the most capricious stomach.

Price 50 cts. Per Bottle of All Druggists.

MANUFACTURED BY HATTIE & NYLIUS, HALIFAX, N. S.

Eggs for Hatching.

From the following varieties: B. P. Rocks, Golden, Silver and White Wyandottes, Black Minorcas, Provincial Exhibitions, 1898, on 23 entries, we won 21 prizes, winning 1st prize on each variety entered, competing against birds from N. B., P. E. I., and N. S. In Pekin Ducks we made a clean sweep, 1st and 2nd prize on old and 1st and 2nd on young.

MILLER BROS., 101-103 BARRINGTON ST., HALIFAX, N. S.

THE SLATER SHOE

Resting the Feet. A hard mattress rests the sleeper more than a downy feather bed, because it does not press so many parts of the body at once, relieving certain bumps while the others are being lain upon.

No two pairs of shoes are exactly alike on the inside, and changing them once per day causes different portions of the feet by throwing the weight upon other parts. This gives a surprising restfulness to the feet, as well as to the shoes, which also gets tired, just as a razor does.

Leathers should always be chosen according to the condition of the feet, as they differ materially in effect and purpose.

On every pair of "Slater Shoes" there is a tag, which tells the exact leather used, giving its peculiarities and the wear it is adapted to.

You can thus buy "Slater Shoes" intelligently and know that they're Goodyear Waxed, if you see that they're stamped on the sole with the name and price—\$3.00, \$4.00, or \$5.00.

AGENCY C. H. Sorden, Sole Local Agent.

DOMINION ATLANTIC RAILWAY.

"LAND OF EVANGELINE" ROUTE. On and after Wed., March 16th, 1899, the Steamship and train service of the Railway will be as follows:
