REID NEWFOUNDLAND COMPANY.

Is your house really lighted from top to bottom or do you still have to take a candle or lamp when you go to the attic or cellar at night? A great many people who have electricity in the rest of the house have no light in the cellar or attic because it is seldom needed; but, when you do need it, you need it badly.

One Incandescent Lamp set in a Holophone Reflector will give sufficient light for the darkest cellar or attic. Holophone Reflectors are especially adapted to lighting places of this sort as they control the light rays so that every ray is utilized. Wouldn't it be a convenience if you could turn a switch and light your cellar or attic before entering? That means an end to dangerous matches and flames—it means that you no longer need stumble against misplaced boxes and bark your shins in the dark.

We would like to tell you more about electric lighting and more about the wonderful light-saving Holophone Reflectors. May we send a representative to see you?
