**T**HE shipping season is now on, and I take this opportunity of again urging fruit growers to keep specific data of all their shipments. A number did this last season, and these records were of great assistance to our Transportation Committee.

The ordering of cars should be done in writing, keeping a duplicate copy, a record of date ordered; on the back of this a record of date supplied, giving car number and initials, destination of each car, when and where shipped, date of arrival, etc.

For all car lots, the shipper should notify the agent when he will start loading and the agent must then give the shipper a clear bill of lading without notation "Shipper's Count". Insist on getting such, otherwise loss by pilfering, etc., returns to shipper L.C.L. The railway company must load.

There is no additional charge for heaters supplied for carload traffic. The proper heating equipment for each car is four heaters.

**MAN IN CHARGE**

The privilege is granted of sending a man in charge of heated refrigerator cars, free, and the railway company will allow him a return at the rate of one and one-half cents a mile.

In transit the local agent should supply gratis a report of car shipments passing divisional points.

Refrigerator cars or box cars when refrigerators cannot be supplied should have slatted floors, but when shippers have to
