

THE STRONGEST and BEST CULTIVATOR IS THE MASSEY-HARRIS

The Variety of Work which can be done with it is astonishing.

The Movable Tooth Seat admits of Spacing the Teeth for different kinds of Cultivating. This is a most handy contrivance.

The Frames of the Sections are made of Solid Angle Steel, while the Teeth, which are adjustable, are of Spring Steel.

Note the Patented Helper which greatly strengthens the Teeth and prevents them breaking when coming in contact with any obstruction.

The points of the Teeth are reversible, adding double to the wearing life of the Teeth.
