

*Surgery—Examiner, Dr. CAMPBELL.*

- 1 What kind of an articulation is the knee joint?
- 2 Is it frequently dislocated?
- 3 What are its dislocations?
- 4 Are they generally complete or partial?
- 5 To what does this joint owe its great strength?
- 6 Which of its ligaments are most powerful in preventing dislocation?
- 7 What kind of an articulation is the hip joint?
- 8 Describe its ligaments.
- 9 What are its dislocations?
- 10 What are the symptoms of dislocation upon the dorsum ilii?
- 11 How do these differ from those of fracture of the neck of the femur?
- 12 How would you examine for crepitus in a case of suspected fracture?
- 13 What are symptoms of dislocation into the obturator foramen?
- 14 What is the essential difference between the symptoms of this dislocation and those of the former.
- 15 What causes the bending forwards of the body?
- 16 What is hernia?
- 17 What is commonly meant by hernia?
- 18 How is hernia divided?
- 19 What are the symptoms of reducible inguinal hernia?
- 20 What is the character of the tumor when it contains omentum?
- 21 What, when it contains intestine?
- 22 How could you distinguish each when returning it?
- 23 What are the symptoms of strangulated hernia?
- 24 What name is given to the process of reducing a hernia?
- 25 What is the common termination of strangulated hernia if unreduced?
- 26 What is the result when the tumor sloughs?
- 27 What means should be employed for reducing a strangulated hernia before having recourse to the operation?
- 28 What are the boundaries of the femoral ring?
- 29 Where is the stricture situated in femoral hernia?
- 30 In what direction would you cut in operating?
- 31 What artery may sometimes come in the way of the knife?
- 32 From what artery is the obturator generally given off?
- 33 What other artery frequently gives off the obturator?
- 34 What courses may it take to reach the obturator foramen?
- 35 Which of these exposes it to the knife of the operator?
- 36 How would you avoid wounding it in such a case?
- 37 What is meant by concussion of the brain?
- 38 Describe a case of concussion.
- 39 What should be done in the first stage?
- 40 Why should the head be shaved?
- 41 What is to be feared in the second stage?
- 42 What symptoms would indicate excessive reaction or incipient inflammation?
- 43 What is an ulcer?
- 44 By what is it caused?
- 45 What always precedes or accompanies it?
- 46 What is the general division of ulcers?
- 47 How are those not tending to heal, subdivided?
- 48 What are the characters of an indolent ulcer?
- 49 In whom are they generally found?
- 50 What treatment do they require?
- 51 Is it absolutely necessary that rest be maintained after the
