HALIFAX, NOVA SCOTIA, OCTOBER, 1902.

No. 10.

Peptogenic Milk Powder

makes cows' milk practically identical with mothers' milk, and thus adapts it to the digestive functions and organism of the nursing infant. There is no other method of infant feeding which gets so close to Nature as that afforded by the PEPTOGENIC MILK POWDER and process.

Peptonising Tubes

for preparing peptonised milk and other foods for the sick—were originated by Fairchild and introduced to physicians in 1882. Each box contains twelve tubes, and the contents of one tube will peptonise a pint of milk.
