

## MENTONNIERE [CHIN SUPPORTER]

Is a marvelous French invention. It is the only chin support that will positively prevent and overcome the drooping of the corners of the mouth, and the vilted throat.

It prevents abnormal tissue formation, rests and supports the tired neck and relaxed muscles, holding them in position where they contract and retain their natural shape and firmness, thereby insuring a perfect contour.

LADIES—Have you seen the latest in the Sleeping Mask? Will keep the face fresh, firm and youthful, prevent the formation of lines and wrinkles.

It is a pleasure to show you one.
