

THE UNIVERSITY is designed to be eminently practical, and to afford facilities for the attainment of the Scientific knowledge necessary in the Professions, (except Divinity,) and in all the chief callings in Society ; to furnish, as far as a public institution can, that kind of Education which Milton so well describes : " I call a complete and general education that which fits a man to perform justly, skilfully, and magnanimously, all the offices, both private and public. of peace and war."

The entire system to be in one University, and under one organization, embracing the several Faculties and Departments above specified.

The Trustees for the management of the property, and for the election of the Professors in the University, to be appointed—one by each Municipality which shall make an appropriation of £500, and one by the Governor General. Each Municipality to appoint one Trustee for each £500 appropriated.

CITY HALL, Hamilton, 1st June, 1855.

J. HURLBURT, A. M., B. C. L.

DEAR SIR,—At your request I beg to enclose you an extract from the Report of the Finance Committee adopted by the City Council on the 28th May last.

I am, Your obed't Servant,

THOS. BEASLEY,
Clerk of City Council.

REPORT OF THE FINANCE COMMITTEE,

On the Memorial of Mr. Hurlburt, in reference to the establishment of a UNIVERSITY in Hamilton. Adopted by the City Council.

The Memorial of Mr. Hurlburt referred to your Committee by this Council, asking the Corporation to investigate and report upon the propriety of establishing a University in this City for teaching the following branches: 1st, Faculty of Arts; 2nd, Agriculture; 3rd, Mechanics; 4th, Mercantile; 5th, Law; 6th Medicine.

Your Committee gave the subject their serious consideration, and are of opinion that such an Institution is highly necessary.

Your Committee would here remark that the proposed University contains one feature which must highly recommend it to the support of the public. Your Committee refer to the proposed facilities for imparting the scientific knowledge required in every department of practical life. The advantages to Hamilton of such a University must be apparent to all, and especially to those who feel an interest in the education of the young.

Your Committee find, however, that at present they have no power to grant any sum of money to Institutions of this kind; but as soon as an Act can be procured from the Government, giving power to Municipalities to do so, they would then be able to give a more substantial support than at the present time.

THOMAS GRAY,
Chairman of Finance Committee.

May 26, 1855.
