One of the latest prominent gen-tiemen to speak highly in Zam Buk's favour is Mr. C. E. Sanford of Westen, King's Co., N.S. Mr. Sanford is a Justice of the Peace for the County, and a member of the Board of School Commissioners. He is also Deacon of the Baptist Church in Berwick. Indeed it would be difficult in Berwick. Indeed it would be difficult to find a man more widely known and more highly respected. Here is his opinion of Zam-Buk. He says:

"I never used anything that gave me such satisfaction as Zam-Buk. I had a putch of Eczema on my ankle which had been thurs for over 20 years. Sometimes also the disease would break out on my shoulders. I had applied var ous eintments and tried all sorts of things to obtain a cure, but in yain. Zam-Buk, unlike everything else I had tried, proved highly satisfactory and cured the aliment. I have also used Zam-Buk for itching piles, and it has cured them completely also. I take comfort in frelping my brother men, and if the publication of my opinion of the healing value of Zam-Buk will lead other sufferers to try it, I should be glad. For the relief of suffering caused by Pries or Skin Disea-ses I know of nothing to equal Zam-Buk will seed the sufferers to try it, I should be glad. St. John's Parish House.

GARAGE depends for its A existence upon a convenient location. Central sites mean high rentals, restricted area, and reduced profits. The solution of this lies in a two-story garage, which will give the same amount of floor space at a cost exactly one-half or less. But to be successfully operated, a two-story garage requires the installation of a modern freight elevator. If the garage is equipped with

the initial expenditure will soon pay for itself in cheaper rentals, increased floor space, improved facilities for displaying and demonstrating cars, and in the more inviting appearance of the place and its surroundings.

Prospective purchasers—and this is particularly true of the class who buy automobiles—are attracted by a neat, clean and orderly looking garage. It bespeaks the owner's pride in his business and the practice of progressive methods. Then, too, when your customer ad-

The thoroughly substantial and workmanlike manner in which the Otis-Fensom Elevator is built is a guaranty of its reliable efficiency. Both the car and its running gear are built on modern and scientific lines that assure you of its always being in commission ready for instant service. The simplicity of its operation, ease of control and smooth running qualities simplify the work of the garage and reduce the business of showroom and repair department to a time-saying and labor-saving and systematic basis.

dian and British channels. We believe that any advantage that might follow a tying up with American as against British trade, cannot equal the stupendous economic benefits that have come to Canada thru her adhesion to the national policy, which has resulted in the investment, during the last ten years, of a billion dollars of British capital in Canada.

"The preservation of Canadian independence of foreign channels of trade, the operation of which involves the gravest danger of political contro's may necessitate a more thoro regulation of semi-public corporations, and a more effective readjustment of the public machinery to public ends.

"This should be secured by purely Canadian legislative and administrative forces; instead of which there has been a turning to an expedient proposed by American statesmen primarily for their partisan objects, and the spectacle is presented to the world of a Canadian invited to abandon the working out of her own destiny in her own way and in keepings with the declaration of policy laid down by Sir Wilfrid Laurier about the time he asserted that the twentleth century belongs to Canada."

BROCKVIIAE, Sept. 20.—(Special)—On the eve of polling Brockville turned out en masse to night to the last shots of the campaign, fired at the skating rink in support of the candidature of John Webster, the Conservative candidate, who was enthusiastically received. Speeches were delivered by Mr. Webster, Mr. Donovan, Rev. S. J. Robins and Harvey Hall of Toronto. The last mentioned paid his respects to James Murdock, vice-president of the Brotherhood of Raiway Trainment and completely shattered his arguments that the government was entitled to the support of the railway men. Mr. Hall also showed that reciprocity would work to the detriment of the railway men. Mr. Hall also showed that reciprocity would work to the detriment of th

Wilfrid Laurier about the time he asserted that 'the twentieth century belongs to Canada.'

"At the best, the economic advantages claimed for reciprocity are illusory. They would make Canadian commerce subsidiary to the United States; and would open wide the door to the destruction of that special and enviable commercial, social and political distinction which belongs to Canada's victory over climatic, geographic and political disadvantages; which has made her the object of the envy, as she was previously the subject of the contempt, of her republican neighbor.

New Era Dawning.

"The possibilities of Canada's future within the British Empire are only just beginning to be understood. The United States has at last recognized them. President Taft, who has described the imperial bond as 'light and almost imperceptible,' has also prophesied that the endorsement of reciprocity by the Canadian people will prevent within the empire a commercial union such as he predicts will follow with the United States, if reciprocity carries.

"To those whose blood answers to conservative party is hopeful of redeeming the riding, and that they will accomplish the trick seems evident, if the widespread opposition to reciprocity is any criterion. The Liberals, however, are moving heaven and earth to ward off defeat.

ment was received with wildest cheering.

Mr. Fowke had denied the truth of the statement as to the working of the dumping clause. The greatest and best expert opinion available had been "that the dumping clause will not apply to any article specified in this pact." What had Mr. Fielding, the workbler, said when this query was put to him? He was doubtful. First he said: "I do not think the dumping clause has been abrogated." Secondly, he is doubtful, and later on said: "It is a matter of legal interpretation."

That is the trouble with the whole reciprocity pact. It is involved in to much doubt, both as to its origin and its result. No manufacturer will dare to embark in any line affected by this reciprocity deal.
