in public life, but who trampled upon the sacredness of womanhood and desecrated the sanctity of home life.

Were such men nt rulers ior a country or city? To-day the lives of all public men should be an open book. The treatment by both political parties at Ottawa of the scandals alleged against men in high positi:n was not a very edifying spectacle. To endorse the idea that public men's private morals were their own affairs that did not concern citizens was to endorse pagan rather than a puritan idea, and would make those who supported it a lot of canting hypocrites. People to-day would not tolerate mur-

derers, pirates, embezzlers, woman-beaters, or seducers in public life. Good overnment and good laws could only be enacted by those who led clean, honest, upright lives. As public men simply represented the people who elected them, it behoved them all to see to it in the interests of sound progress and higher and nobler civilization that they selected only n'en of unblemished character to control the destinies of this great country.
