Ottawa Electric Light Bills Cut Frequently, Under Hydro Power System.

The Ottawa Hydro-Electric Commission has had a splendid year and the report of its activities for 1920, just presented, is such as to give much foundation to the belief that in a few years the city will own the plant outright and without any debt.

Now Have 10,939 Customers. The revenue for last year was \$805,313.79, representing an increase over 1919 of a little more than \$30,000.

In 1905, when the city took the plant over, the number of customers was 1,814 and the revenue \$47,318.95. Last year the number of customers was 10,939, an increase of 646 over 1919, while the revenue now is more than six times what it was in 1905.

Rates Reduced Frequently. At that time the rates for domestic light were eight cents per K. W. with a meter rental of \$1 per annum.

At a statement of assets and liabilities is also submitted by the commission. This shows that the value of the plant is \$1,122,142.72. There are also other assets, including sinking fund \$205,404.00 and Victory Loan bonds, \$50,000, which make the value of the total assets \$1,477,546.72.

There is thus a balance of assets over liabilities of \$880,084.83, which is a very satisfactory showing, considering the fact that the plant has been owned by the city, via, sixteen years.

The amount which is given as the value of the plant represents the amount of money actually put into it, and not its value at present-day prices, which will undoubtedly be considerably in excess of this value.
