TWO DAYS AHEAD OF

Annual Report of Ogilvie Company Submitted at Meeting at Montreal.

SUCCESSFUL YEAR.

Montreal, Oct. 1.-The annual meeting of the Ogilvie Flour Mills Co., Ltd., was held at the head office of the company here to-day. The directors' report for the year ending August 31st, 1902, showed that the gross business of the company during that period was the largest the net results were eminently satisfactory. The report, was unanimously

In commenting upon the report, the Hon. Geo. A. Drummond remarked that the statements submitted were suffi-ciently clear to intelligent business men to show that the company was in an exceptionally strong position and well managed. Speaking in a reminiscent way, Mr. Drummond stated that he probably M. S. Moana were beaten this morning by that ship when she arrived from Auscould look back to the early days of the by that snip when she arrived non-late that have trailed via Suva and Honolulu, a full day ahead of time. The steamer was not looked for until to-morrow, and even then would be a day ahead of time table. Her officers had calculated on making the officers had calculated th her officers 4ad calculated on making port last night and say that they would have done so but for a fog which the steamer ran into when entering the Straits. A day was made on the passage to Snva and another was gained on the remaining distance to port. The officers had heard of the record time o which the Aorangi's mail had made in would be equally as well conducted in which the Aorangi's mail had made in reaching England and were determined that the Moana would also come in for distinction. They had hoped to connect with the Eastern express at Vancouver

istinction. They had happen as at Vancouver of the company. The company of the company of the company of the company of the company. The company of the company of the company of the company of the company. will not be able to carry out this programme.

The account of the voyage as furnished by Purser Bendall is as follows: "Left sydney, N. S. W., on the Sth September, in the state of the company for the ensuing year, paid a high tribute to his integrity and ability, having known him for a dney, N. S. W., on the 8th September, 1:10 p.m., and arrived in Moreton ous other companies.

at 1:10 p.m., and arrived in Moreton Bay, Brisbane, on the 10th at 6 a.m.,

Mr. Creak, in accepting the appoint-Bay, Brisbane, on the 10th at 6 a.m., Sailed again next day at 1:30 a.m., discharged pilot at 5 a.m. and arrived at Suva on the 15th September at noon.

Left again at 10:30 p.m. same day and arrived at Honolulu on the 23rd at 5 and that he considered it due to the a.m. Sailed again at 1:30 p.m. the same managing director and his staff to exday. Cape Flattery abeam on the 30th press his opinion of the way the busiat 4 a.m., and anchored off William ness was conducted, and that he knew Head at S:10 a.m. During the entire of no company among the many with woyage the Pacific was as a 'sea of oil.'" which he had been associated, where the The Moana had not so large a passenger list on this voyage as she carried on her last trip. ROSSLAND CAMP

children, Mr. and Mrs. Foxguard and Last Week's Shipments Amounted to Over three sons, Mrs. Duffy, Mrs. Tyas and Eight Thousand Five Hundred Tons.

ott, Messrs. Little, A. Whyte, E. Nun- Last week the shipments from the Rose nelly, A. Sorsa, J. Laing, V. Samuelson and A. H. Elliott.

The ship's consignee list contained 36 cases of mineral water, easily nearer 1,000 than 8,000 tons, says the Rossland Miner. The record is of special interest, masmuch as it demonstrates 49 pkgs. of timber, 8 cases of meats, 10 around what may be expected in the ship-The ship's consignee list contained 36 cases of tima, 35 cases of mineral water, 49 pkgs, of timber, 8 cases of mers, 10 cases of trencle, 6 barrels of oil, 275 bales of skins and sundry packages of merchandise.

On the voyage an event of uncommon happening aboard a steamer occurred. The passage was the 50th double voyage which the ship has completed across the Pacific, and it also marked the 50th antiversary of the skipper's life and works on the remarking presentation of a silver pitcher bearing a suitable inscription. The present was accompanied by an address signed by all the passengers, which read as follows:

We, the passengers of the S. S. Mona, are desirous of expressing our pleasure at fading ourselves under your charge on an occasion that is truly a red letter one, for the present voyage, as we understand, you are present voyage, as we understand you many years of health and hope, and the present of the pre

YMIR. in the history of the Ogilvies, and that bare and a rich seam of ore uncovered

The recent bush fire, though it cost the Ymir mine \$4,485, was the cause of one good strike. A portion of the surface of the Tamarac group was burned which is now being exploited. Tenders are being called for by the Tamarac company for the sinking of a new shaft. GOLDEN.

There are already many signs of aproaching winter. The mountains have put on a thin cap of white, which in warm days almost disappears, only to be speedily renewed when the sky is next The waters of the Kicking Horse and

he Columbia are gradually lowering, so that canceing has been for some time Rev. J. E. Hogg, pastor of the Presoyterian church, has left for other duties

n the Northwest.
Inspector Wilson visited the schools here last week. He is now on a tour of inspection up the Columbia valley.

___ PAIRVIEW.

A circular from President Russell, of the Fairview Corporation, just issued, says: "The statements made by Mr. A. A. Davidson, in a circular recently issued to the shareholders reflecting on me, are deliberately and intentionally misleading, and will be most completely explained to the shareholders at the earliest opportunity. A full report will shortly be issued and the shareholders will afterwards have an opportunity in public meeting of discussing my actions as their managing director, and I am satisfied that both my actions and conduct will be ratified and approved by them. A cable from London was received on the 13th inst. stating that the deal was fixed."

EHOLT.

This month has seen a decided improvement in general business at Eholt. The resumption of work at the B. C. mine, situate about a mile and a half from the town, is chefly responsible for this gratifying change for the better. About 70 men are now employed at the B. C. mire, which is shipping an average of 130 to 140 tons of ore a day to the Boundary Falls smelter. This ore is being mined in the old workings. A pros-pect shaft is being sunk on the south end of the B. C. claim. This is now down nearly fifty feet and some good ore has been met with in it, but little is being seid about it.

The Emma continues to ship ore on a small scale to the Hall Mines smelter at Nelson, giving employment to seven or eight men in mining it.

LADNER.

dent for his kind words, and begged to | a much better show than usual. The shorthorns of Reeve will be seen at Westminster show.

LILLOOET. The exact location of the hatchery empties a mile from the lake into Cayoosh creek, a large stream coming from the mountains a short distance south of Seton lake, and which enters into the Fraser three mils below the lake. The outlet, while carrying a considerable vol-ume of water, is wide and shallow, and at several points affords excellent opportunities for the placing of weirs to intercept the fish, and having the hatcheries immediately adjoining. The sockeye enters Cayoosh creek in great quantities every year, so that there are plenty of ripe fish and suitable waters for the disribution of the young fish .- Prospector. NELSON.

The school house at Willow Point. about six miles from Nelson, on the north shore of the Arm, has been completed, but there is as yet no word of a teacher being appointed. Heavy snowfalls in the hills have filled the creeks and dissipated all fears of

a continued water shortage at some of

the district mines. Rev. J. H. White will resign his pastorate here, though continuing to reside in Nelson. He will make it the centre of mission work for Methodism, in which he is about to engage, as his spe-

cial work of the immediate future. The fall assizes, which open to morrow, although not having a long list of cases, have one of more than ordinary ortance, that of Rex vs. Rose. This will be the first murder trial that has been held at Nelson for some time, and is concerning the killing of C. Cole at Nakusp. If the prisoner is acquitted of the charge there is a second case on the list in which he figures as defendant, that of Rex vs. Rose for assaulting Demars, on the occasion of the murder. The civil list includes Cane vs. McDonald, a dispute over partnership rights; West vs. Waterman, a case to set aside tax sale: McQuillan vs. Fry, Fry vs. Botsford: Manley vs. Arlington: Dockstader vs. Botsford, all cases relating to min-eral claims; Winter vs. K. & S. railway, and Lever vs. McArthur, damage suits. Chief Justice Hunter will pre-

side. There has been a heavy fall of snow on the mountains above the lake, and the weather here is growing perceptibly cooler and presaging the coming of

winter.

A series of volunteer lectures on D. C. O. Riffes, held a church parade to all corks.

"First Aid to the Injured" is to be given Crittenden Society.

Local architects are preparing plans which augur the addition of some fine sidences to Nelson in early spring, there being a present lack of better class housing in the city.

GREENWOOD.

The Montreal & Boston Company's Sunset mine, at which work has been resumed after the temporary shut-down aused by the recent shortage in the coke supply, is again shipping ore to the company's smelter at Boundary Falls. A sufficient output of ore is being maintained to supply the requirements of the smelter above its receipts of custom. ores, and at the same time an active policy of further development is being instituted at the mine. Before sinking he main shaft deeper and doing other evelopment work, however, the diamond drill will be used freely on the lower levels, drilling both downwards and laterally, so as to locate the ore bodies and assist in determining where sinking or crosscutting may be done to best advantage. A second furnace is to be put in the company's smelter so as to acmodate the larger output of the Sunset mine.

The Greenwood smelter now in full blast is reported to be doing excellent | Christ church, the officers and non-coms work again, putting through a high daily average quantity of ore which is of a generally better quality than that received from the Mother Lode mine before its ore quarries were so well openrock a marked improvement in average tions, grade of ore is reported. The

peresentatives of several mining ma-hinery manufacturers is regarded as in-ciative of an expectation that times in

was held at Westminster junction on Saturday, and was a marked success. In making a beginning, the directors decided not to have any live stock exhibits, but to bend their energies to make a creditable display of articles usually seen as, the present ward divisions do not comply with the foregoing requirements of the charter, but are very unequal, the charter of the charter, but are very unequal, and the charter of the cha roduce was a revelation to many. The how was opened by Richard McBride, M. P. P., who after an inspection of the exhibits delivered a congratulatory address. The best exhibits in each departnent will be used in making the district display at Westminster. The most con-spicuous articles were the potatoes. peaches, grapes, strawberries, ensilage orn 12 feet high, and a collection of 51 varieties of grasses collected within two miles of the building. miles of the building.

Cowan, of Ottawa, secretary of the Good Roads Association of Eastern Ontario, the Sawyer-Massey Company, of Hamilton, Ont., manufacturers of road-making machinery, were induced to supply free of charge all the necessary machinery for such an enterprise, and also three or four experts to take charge of and operate the machinery. The Can-adian Portland Cement Company, of them as card sharpers. Descronto, Ont., aided the enterprise by donating some 150 to 200 barrels of ce are Prince Charles de Looz-Coswarem. ment for the construction of concrete who committed a number of gigantic culverts which are much more satisfactory than wooden ones for drainage purposes. Further assistance was given to the movement by the Canadian Pacific, Grand Trunk Canada Atlantic, and Ottawa & New York railway companies, which all agree to transport the necessary machinery and experts over their things is said to exist there also.

able for the purpose. In order to give an object lesson on the value of such coads, and the proper manner to build them, the good roads train was employed to build a model stretch of stone road from a third to a half a mile in extent, in each of ten counties, and to roll and grade an additional stretch. The selecon of the various stretches of road was eft with the county councils, with the anderstanding that the township officials should furnish all the necessary stone, teams, laborers, etc. Owing to the heavy

habitation along them most desirable; sides, so that the water will readily run they economize time and force in trans- off into the ditches. After rolling with portation of products, reduce wear and the big steam roller, a trench about tear on horses, harness and vehicles, and eight feet wide and six inches deep is They raise the value of farm lands and this trench is put a first layer of coarse farm products and tend to beautify the broken stone; then a layer of fine stone, country through which they pass; they lastly a layer of still finer stone as a acilitate rural mail delivery and are a dressing. This last layer helps to bind tent aid to education, religion and all the stone into a solid mass, while the sociability. Charles Sumner once said, sides of the trench hold it all in place. "The road and the schoolmaster are the The ten-ton steam roller is run over each wo most important agents in advancing layer of stone as it is put on. The roll ing is always done down the sides of The aim in making a good road is to the trench first so that the stones will stablish the easiest, shortest and most be crowded towards the centre. When economical line of travel. It is there- the rolling of the sample stretch is comfore desirable that raods should be hard, pleted, the stone should be about seven smooth, comparatively level, or laid out inches deep, which is sufficient to stand on the ground so that their grades ordinary traffic. Such a road may heave drawn over them without great loss the expense of keeping it in repair will

ARISTOCRATIC CONVICTS,

A Vienna paper states that few people have any idea of the large number of men and women of noble birth undergoing penal servitude on the continent. It estimates that Russian prisons alone contain 12.000 aristocrats, while there are several thousand noblemen in the penal establishments of Italy. Two Dukes of Notarbartolo are, for instance, life in the Italian prison of a Maddalera for the brutal murder of a young officer

whom they had swindled at card playing, Among the convicts in a Belgian prison Marquis of Varela for the murder of his

own mother. In France there are several hundred titled aristocrats in prison, and though no statistics are available regarding Aus tria and Germany, the same state of
