

more

than an

engineering

specialist

Today — more than ever before — aviation engineering in the RCAF offers outstanding opportunities to the engineer with the ambition and enthusiasm required in this important profession.

The Engineering Officer in the RCAF must be more than a technical specialist; he must develop abilities to deal competently not only with professional problems and assignments but also with people and human relations.

Graduate engineers are eligible for commissioning in the RCAF as technical officers in any of the following

Branches: Aeronautical Engineering;
Armament Engineering; Construction Engineering;
Tele-communications Engineering;
Photographic Engineering;
Mobile Support Equipment Engineering.

For more detailed information concerning engineering positions, pay and pensions available in the Air Force ask for the booklet "Engineers in the RCAF"
