## WORLD'S COPPER SUPPLY IN CONTROL OF GREAT BRITAIN

Blockade was effective — Impossible to ship copper to enemy, and German Americans had to accept English terms.

Boston, Mass., April 21.—The Boston News Bureau is able to announce that Great Britain is now in control of the world's copper supply outside of Germany.

While making the blockade against Germany's commerce effective, negotiations were made in London to control the Amalgamated Copper supply, and after these were consummated other interests were dealt with one by one. Of course, the last parties to be approached were the German interests in America. The blockade against Germany proving effective it was no longer possible to ship copper from America through neutral countries into Germany.

Therefore there was nothing left for the Germans in the United States to do but to accept the English terms. Consequently all copper output in this country is now by agreement under English control. Orders have been given full speed ahead at all American copper mines and the entire output will be sold in conjunction with the British government.

England will take the entire surplus, and what the French could not do twenty-seven years ago and H. H. Rogers and his Standard Oil associates could not do "hold the entire copper supply of the world," the British Empire will now do as a war measure. A hundred million dollars investment in copper has heretofore been the limit as measured by the efforts of the French under Secretan or Amalgamated under Rogers, but in a war costing \$40,000,000 a day the control of the world's copper supplies is a mere incident as respects cost.

## MONTREAL CASH SALES

Morning.
