The simpler life one leads the longer he lives. Thomas Parr of Shropshire, England, was a plain man and worked on a farm for a livelihood. At 120 years of age he was at his daily he was heard of in London. The king desired to see him and ordered him to the palace, where he was so richly and royally treated that it destroyed his health, and he died at 152 years and 9 months of age. When Dr. Harvey, the discoverer of the circulation of the blood. post mortem examination of Thomas Parr, he declared there were no signs of senile decay in the body. That man

must have renewed his youth, like the eagle, again and again.
You cannot tell how old a man is from the number of years he has livfrom the number of years he has lived. I have known people actually boyish in their disposition at 80 years of age, while Louis II., King of Hungary, died of old age at 20. Haydn's oratorio, "The Creation," was composed at 70 years of age. Humboldt wrote his immortal work, "The Cosmos," at 75. William Cullen Bryant, at 82 years of age, in my house read without spectacles posed when 18 years of age. Iso-crates did illustrious work at 94. The X ray has turned the human body, which was opaque, into a lighted castle. It is easier in this age to renew one's youth, than in any other age. When Paul stop-ped the jailer from suicide by commanding, "Do thyself no harm," he showed himself interested in the physical as well as moral life of man. Among the blessings which God promised was that in which he

your soul that most needs rejuvena-tion, but that will also help bodily vivification. In order to do this, I advise you to banish as far as possible all fretfulness out of your life. The doing of that will make you ten years younger. I know many good Christian people who are worrying themselves out in managing the atfairs of the universe. They have unitself toward the noonday sun. It team. But after awhile in its life amities, and it is telling on their comes the molting process, and it looks ragged and worn and unattractive, and feels like moping in its nest on the high crags. But weeks go by, and the old feathers grass on the rock, mourning about the woes of the ornithological world, the loneliness of the pelican, the filthe raven, the recklessness of the albatross. Would that improve things? No. It would be a molting process for that eagle which would never close, and it would only thinner and more gloomy and less able to gain food for its young and less able to enjoy a landscape as it appears under a 20 mile flight on a

Better trust him in the management of his world and of younger. Coming on toward old age all worlds. All you and I have to you are only in the molting season, do is to accomplish the work that is put in our hands. That is all we have to be responsible for. In a well managed orchestra the players upon stringed and wind instruments the body as well as of the soul, and do not watch each other. The cornethe first part as well as the latter etist does not look to see how the tiolinist is drawing the bow over the strings, nor does the flute scru-tinize the drum. They all watch the baton of the leader. And we are all carrying our part, however insignificant it may be, in the great bar-mony of this world and of the uni-verse which our Lord is leading, and we all have to watch his command and do our best and not bother our-selves about the success or failure of other performers. If you want to

renew your youth, better stop managing the affairs of the universe. Another mode of rejuvenescence is much of the time associating with those younger than yourself rather than with those who are as old or older. If you have no children of your own, better adopt a child. There are in this country and in all countries orphans by the tens of thousands. Go to one of the asylums or institutions where friendless children are cared for and select some little one with an honest eve and disposition and take him to our home. Put around him all the elevating and happy influences you can provide. In two years he will become part of your life, and his company to you will be indispensable. It will make you 20 years younger. He will be an illumina-tion to the evening of your life, and he will speak your praise long after ny house read without spectacles you have departed from this world, and in heavenly places you will have and in heavenly places you will have been rewarded by the great friend

While you do them good they will do you good. The old engle while companioning in the nest with young eagles will feel new trencht coming into his wing, new body? Then it will be home. Here nest with young eagles will feel new strength coming into his wing, new light into his eye, new ambition to cut a circle nearer the sun, and for the time will forget hurricanes that have ruffled its plumes and the storms of many years that have swept over its mountain eyrie. The closing years of life ought to be the best part of it, as an arrival in port ought to be happier than embarkation. It is better to have the cycles and more prosperous years.
