The cause of *universal education* deserves the utmost support that the governments of the world can lend to it. The decision-making agencies involved would do well to consider giving first priority to the *education of women and girls*, since it is through educated mothers that the benefits of knowledge can be most effectively and rapidly diffused throughout society. In keeping with the requirements of times, consideration should also be given to teaching the concept of *world citizenship* as part of the standard education of every child.
