APPENDIX VI.

INDIA.

CHART SHOWING VALUES AND TONNAGE OF PRINCIPAL COMMODITIES EXCHANGED BETWEEN INDIA AND OTHER COUNTRIES.

THE accompanying Chart* has been prepared in order to show the importance of Oversea communications, their protection and maintenance, to India.

India, while dependent upon certain commodities which are produced abroad, is in her turn under the necessity of exporting the commodities which she produces to pay for her imports.

This chart shows in graphic form, by black lines for receipts and green lines for exports, the various countries which send goods to, and receive goods from, India. The small circles enclose units of value. The rectangles at the end of the lines show the various commodities in units of weight. The year taken is that ending the 31st March, 1921.

It is realised that in selecting the statistics for any one year certain abnormalities are bound to occur in these figures, but the general trend of Foreign trade will be sufficiently indicated.

The accompanying table from which the chart was prepared shows a more detailed list of exports and imports by weight than could be conveniently included in the chart. It will be seen that in the case of certain manufactures, *e.g.*, textiles, machinery, &c., it has been found impracticable to show a unit of weight as no such figures are published in the Trade returns. Timber has also presented the same difficulty. In these cases the commodity has been shown without any unit, as value would not form a true standard of comparison.

In some cases, the *total* value of the trade with a country may be considerable, while there are no *particular* items which justify inclusion. In these cases, the value of the *total* trade only has been shown as mention of the items would not afford a true perspective.

INDIA: IMPORTS ON PRIVATE ACCOUNT (YEAR ENDING MARCH 31, 1921).
