

**MARKET REVIEW AND FORECAST**

**TORONTO, June 17.**—The first June crop report from the United States Department of Agriculture forecasts a bumper wheat crop, which before harvest may develop into a production of a billion bushels. Based on the estimate of 600 bushels an acre, a production of 1.6 billion bushels is the first of June, the Department estimates. Total wheat production of 251,000,000 bushels, which, if realized would mean a record harvest as the second largest in the history of the country. The crop in the States also promises to be of record proportions, and 175 production would seem to indicate a record.

The excellent germination of seed corn has been a pleasant surprise in many sections of Ontario, and in some counties corn has already received one or more cuttings, and is beginning to be very forward in growth. Fall wheat is beginning to head in some of the south-western counties, but the yield will be small. Prospects are for a fairly full hay crop, to be cut about a week earlier than usual.

The high price of cattle has been the outstanding feature of the past week, quotations being 10 to 12¢ higher than those of last week, making for the highest prices in the history of the Canadian cattle trade. Hogs and butter have been firm, and the grain market shows slight advances.

The fact that considerable replanting has been done in the United States and the Western States, has contributed to a stronger situation. From now on there will be a wider spread in price according to quality. Fresh eggs in progress, all markets being absorbed in this way.
