Machine for making Hollow Concrete Building Blocks.

Concrete Houses

built entirely of hollow blocks made
of Cement, Sand and Gravel, and
moulded in one of the Palmer Building-
Block Machines. The only practical
method for building where
building material is so expensive.
Substantial, dry, durable, fire and
vermin proof buildings of all descrip-
tions and sizes are erected in Con-
crete with greater rapidity, facility
and economy than by any other
system of building, and without
skilled labor. The Hollow Block
makes the wall warmer in winter
and cooler in summer than brick or
stone.

Write us to-day for circular and
full information concerning ma-
chine, patents and territory.
