

SIMPLE MACHINES FOR WISE FOLKS THE NEW IMPROVED DE LAVAL SEPARATOR

is so simple that only one tool is required to entirely remove its few parts and re-assemble them—it requires no expert. The neck bearing can be removed and replaced by the merest novice and centres itself automatically. The spindleless bowl cannot be injured in removing it from or replacing it in the frame, and it is impossible to throw it out of balance or cause it to vibrate in ordinary or extraordinary use. Every part of the machine is made as accurately as a watch and in operation it is practically noiseless. It is the housewife's machine, beautiful in design, perfect in construction and infinitely simpler than her sewing machine. It pays for itself.

Write for catalogue and name of nearest agent.

Standard Gas Engine Oil

Is the Only Oil You Need for
Gasolene and Kerosene Engines

It provides perfect lubrication under high temperatures without appreciable carbon deposits on rings or cylinders, and is equally

good for the external bearings.

Steam Traction
Engines
and
Steam Plants

Capitol Cylinder Oil
delivers more power, and makes the engine run better and longer with less wear and tear, because its friction-reducing properties are exactly fitted to the requirements of steam traction engines and steam plants.

Traction Engines,
Wagons, Etc.

Mica Axle Grease
makes the wheel as nearly frictionless as possible and reduces the wear on axle and box. It ends axle troubles, saves energy in the horse, and when used on axles of traction engines economizes fuel and power.

Reapers,
Threshers,
Plows, Harrows

Granite Harvester Oil
insures better work from the new machine and lengthens the life of the old. Wherever bearings are loose or boxes worn it takes up the play and acts like a cushion. Changes of weather do not affect it.

Every dealer everywhere. If not at yours, write for descriptive circulars to

The Imperial Oil Company, Limited

KEEP YOUR STABLE CLEAN

With a "BT" Litter Carrier

What work is harder or more disagreeable than cleaning out the stable? A "BT" Litter Carrier will make this work easy, for with it four barrow loads of manure can be removed from the stable at one time—no heavy wheeling, no climbing through snow or mud. If desired, the manure can be dumped directly into a wagon or sleigh and save reloading.

Write for our free catalogue, showing best methods of erecting litter carriers, and telling why you should put in "BT" Litter Carrier.

Write to-day to

HEAD OFFICE AND FACTORY, FERGUS, ONT.

HAVE YOU HAD ENOUGH OF LONG COLD WINTERS AND CROP FAILURES?

Can you afford to work year after year for nothing and endure the above conditions too?

There are no drouths, cold winters, hot summers, crop failures nor any other hardships to contend with in Chilliwack Valley.

We are placing many Prairie farmers on beautiful farm homes and we can place about 500 more this summer. Come and see it yourself, and if you do not find what you expected it will be because such an ideal place does not exist on earth.

Send for illustrated booklet and view of the valley, which measures 12 x 18 inches. Information free to all.

Most Satisfactory Power For Plowing

COMPETITIVE tests in plowing contests and actual service on hundreds of farms have shown the IHC gasoline tractor to be the most satisfactory power for plowing. It has changed the drudgery of tilling the soil—one of the most tiresome and expensive operations of farming—to a mere incident in the season's changing routine of farm work. What was heretofore a big job for several men and many horses is now easily accomplished by one man. With a gang plow attached to an IHC gasoline tractor, you can plow several furrows at once without extra help—do better work in less time—at less expense. With an

IHC Gasoline Tractor

you are under no expense for feeding and caring for horses. You have a power that never gets tired. It's as ready to go at the end of the day as it is at the start.

Not being operated by steam, there is no danger of fire—no sparks—no soot. You do not need to be a licensed engineer to run it. You do not require a fireman to help you. There being no heavy boiler to carry, less power is required to run the machine itself, and consequently there is more power available for pulling. An IHC tractor consumes little gasoline compared with the number of acres plowed. It can be turned in a small space. The same tractor that does your plowing will do your heavy hauling, supply power for operating your shredder, sheller, thresher, and other farm machines, and for grading roads.

Make it a point to get all the facts about this wonderful labor-saving, profit-producing machine before the fall plowing season begins. See the IHC local dealer, or, write nearest branch house for catalogue and full particulars.
