CASE

Famous the World Over

Case Steam Engines

Famed for Power, Simplicity, Durability, Economy

This Company wants it understood by all farmers that the development of Case Kerosene Tractors has not interfered with the development of Case Steam Tractors.

We have two separate departments. We have been making steam tractors for over 40 years. We designed our first gas tractor 26 years ago.

Case Steam Tractors, which have long been in the lead, receive the same or even more attention. We are continuing whenever improvements are presented, to better Case Steam Tractors. Our engineers and experts are always on the lookout.

Case Steam Tractors in Eight Sizes

Many men believe that in certain sections and for certain work, steam is preferable to gas. So the Case line of Steam Tractors is complete. We make them in sizes from 30 to 110 horsepower.

Case Steam Tractors are used in all parts of the world for plowing, driving threshing machines,

operating silo fillers, running baling presses, and other lines of farm work. They are also used for hauling, road building, etc.

Case Steam Tractors, like all Case machinery, are not built to sell on price alone. They are built to meet a quality standard which is demanded of every Case product.

Farmers know they can turn to a Case product with confidence. They know they are getting dollar for dollar value, and an engine on which they can rely.

Thousands of Case Steam Tractors are in use all over the world. Their power, dependability and length of service cannot be equalled. They are simple to operate and economical.

Those who are interested in Steam Tractors should write for our catalog, which contains pictures and detailed specifications. A copy will be mailed free upon request.

Those who are interested in other Case power-farming machinery may write for any of the free booklets named below.

J. I. Case Threshing Machine Company, Inc. (Founded 1842) 877 Erie Street, Racine, Wis.
