

Purity Means Health

That why you should use

CEYLON GREEN TEA

in place of the adulterated teas of Japan.

Lead packets only. 40c, 50c and 60c per lb. At all Grocers. HIGHEST AWARD ST. LOUIS, 1904

Won at Last

"They were all so angry with you, that, without giving myself the trouble to think (my usual way, you know), I took for granted that you were a dreadful criminal; still, I was as fond of you as ever—but mother would not hear of my writing. Then I was so bewildered about Finistoun. He came and went, and some people thought he was going to marry Lady Georgina Fitz-Maurice; but I did not. At that it was all settled; then we were frantically busy, and then I was travelling so much, and so selfishly happy. I never gave a thought to any one, which is disgraceful, I know. Now, dear, that I am married to the nicest, kindest, pleasantest of men, I feel that you were quite right to refuse Mr. Waring. Poor man—I liked him very much. It must be quite awful to be united to any one you cannot love with all your heart. Of course, if Mrs. Newburgh had lived, it would have been different. I have told Finistoun all about you. He remembers you last year, and admires you very much. He says you think every girl, but does not think you were wise to throw over Leslie Waring. The best of men, dear Mona, have very little sentiment about other people's marriages. Let us hope they have about their own. I do trust you are not very unhappy. Bertie said he met you, and that you were looking well, and seemed quite bright. Are you still living with that nice, pleasant Mrs. Debrisay? Pray give her my kind regards. I am sure I used to play her matinees. Tell her I had some singing lessons when we were in Milan, and Signor Squallucini—a great man, I assure you—said I had been very well taught."

"We are getting tired of moving about, and intend returning in August to Scotland. Finistoun has a deer forest in the Western Highlands. We shall be there almost all the autumn. If I can at all manage it, I will come and see you as I pass through London; and you must come and stay with me. I am sure you will like Finistoun; he is not exactly handsome, but distingue, and really very clever. My father thinks very highly of him, and he is a sound Conservative. The dear mother is flourishing and looks forward to presenting Geraldine next season. It is lonely, not having a daughter 'out.' Good-bye, dearest Mona. You will forgive my neglect and grant I had a good excuse. Ever your attached,

"Evelyn Finistoun."

"I am not so sure about that," said Mona, smiling, as she put the letter, which she had read aloud, back into its envelope. "But I am most grateful to her for writing at all. She is really a nice, dear thing."

"So she is, I am glad. Squallucini thought she had been well taught. I have heard of him. He gets his guinea a lesson. I dare say I can do just as well, and I thought my fortune made when I first got seven-and-six. Why, Mona, there's a little man trying to open the gate—a old man, with a stick and an umbrella. It must be your millionaire."

"In Glasgow."

"Ah, and now what was your mother's name?"

"Newburgh."

"Ah, just so. Your father's name was John Craig, and he was a clerk in the Western Bank of Scotland?"

"Yes, that was his name. I remember faintly that he was kind and loving."

a bit, and my old master remembered me in his will, so, as I found my health failing, and new men coming into the firm, I thought I would rest a bit, and try to cover up my old cottage and a bit farm awa' in the west, but I got rheumatism, and grew worse, so I cam' up to try a great London doctor, and was recommended to your place in Camden Town. The son of one of our clerks lodges there; but he is out a' day and I suspect a' the night too. I am just wearin' o't; but I am not half cured yet. I wonder if this place is much further from Harley street?"

"By no means, my dear sir!" cried Mrs. Debrisay. "It is a shorter and a pleasanter drive. I presume you are consulting the famous Dr. Switham?"

"That's the man. He is awfu' costly."

"What matter! so long as you can regain your precious health? I think you would find this neighborhood more salubrious, and in every way preferable."

"It will be. I will think of it."

"Will you not take the arm-chair, uncle?" said Mona; "that is such an uncomfortable one."

Mona laughed most heartily. "You wicked, grasping Debi!" she exclaimed. "You want to turn me into a legacy hunter! I assure you I will be kind and attention to my poor father's brother, whether he has a cottage or a castle. He will probably not stay here long, and we may as well make him happy. He must have had a dull life. It must be very hard on him, being shipped away before you have known enjoyment."

"Ah, my dear, don't you be downcast—times will mend."

"Do not fancy I am grumbling. I have some very bright days to look back upon—a quick deep sigh—and the present is far from being unhappy. Only, the Mona Joseelyn of this time last year has disappeared forever, and Mona Craig, a more useful and sensible young woman, has replaced her."

"If I could see you rich and free, and in your proper place, I would die happy; and who knows but you may get you get the better of those cold-hearted Everards."

"They are not cold-hearted. They had a right to be angry, and I have no feeling of resentment against them, though they might have asked what had become of me."

"If that is not coldness, I do not know what it is."

Chicago Tries Sword Canes

THE LATEST MEANS OF DEFENCE AGAINST HOLD-UP MEN.

Notice the canes carried by Chicago men after nightfall and you will probably observe a metal ring or a small almost invisible button in the stick six or eight inches below the handle. Press the button and give the cane a sharp twist and you will be surprised to find that the handle is easily separated from the body of the cane, and that a metal blade, sharp and pointed, is attached to the handle. For the sword canes have lately come into new favor with those who make use of Chicago streets after dark.

And of those who do not carry sword canes, it is a safe bet that nine out of every ten carry revolvers in their overcoat pockets. The entire city is terrorized by the exploits of thugs and bandits. Even theatre-goers carry weapons to the playhouse with them. The man who goes unarmed through Chicago streets at night, even in the heart of the business and theatrical district, is taking long chances.

At the corner of State and Van Buren streets, a few nights ago, a hold-up occurred. In the heart of the city, a man in a dark coat, at night, a countryman from Iowa faced a drawn revolver thrust under his nose, and was compelled to deposite his watch and \$40 in cash. Street after street, hold-ups were within easy reach of the thug, yet he performed his feat un molested.

Twenty minutes later the countryman, who had regained his nerve and had followed the highwayman, suddenly pounced upon the bandit and felled him with a blow. Then he helped himself to his own watch and money, and returned to his home. The highwayman, who had been forced to surrender his own watch. When the Iowa man reported the matter to the police, they decided that he had a clear title to the spoils won from the highwayman.

Another illustration of the boldness of the thugs is found in the experience of a young woman from New York, who is staying at one of the most fashionable hotels in the city. A few minutes before 6 o'clock, one evening last week, she entered the hotel by the side entrance and passed into a long corridor leading to the main lobby. The corridor was deserted except for a young man, who suddenly struck her in the face, forced her against the wall and almost strangled her, at the same time trying to wrench loose her emerald necklace and watch. She was unable to scream, and was fainting when a messenger boy happened to enter the corridor and gave the alarm.

GENIUS OF WESTINGHOUSE.

Importance of His Inventions Recognized the World Over.

George Westinghouse has a creative mind. There is no country in the world, says Success Magazine, where a train runs, or an engine works, or a dynamo turns, in which his name is not honored and familiar. He has brought new mechanisms and new industries into being; he has contributed largely to the progress of modern methods of transportation and communication which have shaped to such an extent the relations between individuals and communities, between nation and nation. The post office, the telegraph, the railways, and the steamship unite the most distant regions. Upon these modern life is wholly dependent in its social, industrial and commercial phases. Stephenson gave us the railway, Westinghouse made the modern complex railway system a possibility by his inventions which control the movements of trains. Had he done no more than this his name would still stand among the great archivers.

George Westinghouse will be 60 years of age next October; he is built on a massive scale, tall and as strong as a blacksmith. He is alert, fastidious, quiet, sanguine and untiring, with a constitution strong as nickel steel. He is a most agreeable man to meet, and has a rare faculty for inspiring others with his own enthusiasm.

BLOODLESS GIRLS

Can Obtain New Health Through the Use of Dr. Williams' Pink Pills.

Anæmia means bloodlessness. Dr. Williams' Pink Pills actually make new, rich, red blood and thus cure anæmia. When the blood is poor the nerves are starved and irritable. Then comes hysteria, neuralgia, sleeplessness and other nerve disorders. Headaches, backaches and aches wear out and depress the poor pale victim. Dr. Williams' Pink Pills soon bring ruddy health and lively vigor. They soothe the jangled nerves and give new strength to every organ. Miss Winnie Allen, Montreal, says: "I was weak and thin, and my friends thought that I was going into consumption. I was as pale as a corpse, had no appetite and did not sleep well. The least exertion tired me out, and if I walked a few blocks I felt almost breathless. My sister advised me to take Dr. Williams' Pink Pills, and after using them for a few weeks I am again enjoying good health, and have good color. I think every weak girl should take Dr. Williams' Pink Pills. Dr. Williams' Pink Pills will cure any case of bloodlessness just as surely as they cured Miss Allen. The pale anæmic needs only one thing—new blood. Dr. Williams' Pink Pills make new, rich blood with every dose. That is why they cure all common diseases like anæmia, indigestion, neuralgia, palpitation of the heart, headaches and backaches, St. Vitus' dance, partial paralysis and the secret troubles that make the lives of thousands of women miserable. Dr. Williams' Pink Pills are sold by medicine dealers or by mail at 50 cents a box or six boxes for \$2.50. From The Dr. Williams' Medicine Company, Brockville, Ont.

DEATH TO MOSQUITOES.

Carbolic Acid and Camphor Used to Kill the Pests.

With the advent of summer the extermination of mosquitoes will again be taken up, and since these insects are now known to be carriers of malaria and yellow fever, and perhaps other less serious ailments, their presence is no longer tolerated with the indifference that once existed. However, so many bright minds have been working on methods of extermination that the present season's campaign will be much more effective than in the past, especially as regards house fumigation.

Professor Sims, of New Orleans, one of the experts engaged during the recent yellow fever scare, has discovered a new fumigant, for interior use, which has received the approval of the United States Marine Hospital service. The new agent has been named "oullicide," and is a mixture of equal parts of carbolic acid crystals and camphor, made up in a solution, and evaporated by means of an alcohol lamp. Four ounces of this mixture is sufficient to exterminate all insects, such as house flies, mosquitoes, roaches, etc., in a room of 1,000 cubic feet capacity. The solution may be put in an enameled wash-basin and supported on a piece of stove-pipe placed over the alcohol lamp. Evaporation is very rapid, 20 minutes being sufficient for application to an ordinary room, and at the end of that time the room may be entered and the windows and doors opened for ventilation without danger or particular discomfort.

Money Makers

Holstein-Friesian cows are money-makers because they are milk-makers. No other breed of dairy cows can furnish so high a percentage of large yields as the Holstein-Friesian breed furnishes. In this breed the large milkers are many, the small milkers are few. In other breeds the large milkers are few, and the small milkers are many.

This is a business point that should attract the attention of business dairymen. The small milkers cost her owner about as much for "keep" as the large milkers, therefore, makes milk at a lower cost than the small yielder. Both are equal at the feed rack, but the large yielder at the milk pail is worth two to three small yielders.

The Holstein-Friesian is pre-eminently a large yielder. She has been made a great milker by Hollanders, and in turn the Hollanders have made her prosperous by her. The world over she is recognized as the greatest dairy cow, greatest for yield of milk, greatest for the quality of milk, greatest for fine butter production, greatest for prepregnancy, greatest for ability to thrive under all sorts of conditions, greatest for proliarity, greatest for longevity and general usefulness.

Farmers, who are producing milk for cheese and for factories, for condensaries or for the liquid market, need to start right. They need cows of vigorous constitution, cows that can consume large quantities of feed and convert it into large quantities of fine milk, and cows that milk long, breed perfectly, and produce calves that grow and rear readily. Such cows are money makers. The Holstein-Friesians are such cows.

The cow that is to make money must make milk in quantities above the average. She must be a large eater, a good digester, a perfect assimilator of digested food, and a ready transformer of the food into fine milk. The farmer should not look for a "small eating" cow, for the small eater will make up financially for the deficiency in quantity. The manufacturer does not attempt to make a ton of steel out of materials that contain only a possible half ton. The milk producer cannot force a ton of milk out of a cow whose food in a given time contains only half a ton of milk.

It is not economy to select for milkers cows that are "light feeders." The light feeder may cost her owner \$4 or \$5 less per year than the "heavy feeder" would cost him, but she will give him only 3,000 pounds of milk a year, while the large feeder will give him 5,000 or 7,000 or 9,000 pounds of milk. The cow that in return for \$5 more in feed can give 2,000 to 6,000 pounds of milk is evidently a money maker. The Holstein-Friesian cow does this.

A DANGER TO CHILDHOOD.

No mother would give her little one poison if she knew it, and yet all the so-called soothing syrups and many of the liquid medicines given children contain poisonous opiates, and an overdose will kill. When a mother uses Baby's Own Tablets she has the guarantee of a government analyst that this medicine does not contain one particle of opiate or narcotic that it cannot possibly do harm. This assurance is worth much to the mother who cares for the safety of her little ones. Mrs. Charles McLaughlin, DeBert station, N. S., says: "I have used Baby's Own Tablets for the stomach troubles and other ailments of childhood and find them so valuable that I would not be without them in the house." Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Company, Brockville, Ont.

Same Ring, New Engagement. Miranda—I accepted Mr. Mashleigh last night and he is going to get the engagement ring to-day. Muriel—Oh he already has it. I returned to him this morning the one he gave me.—Life.
