bind, and within a comparatively short period the demand for wheat has greatly increased at an advance in price of from five to ten cents per bushel. This is attributaed to two causes—the war rumors from Europe and a short Ameri-can supply. As is usual when the mar-ket is affected by two or more influences working in the same direction, it is diffi-cuit to estimate their several effects. On Saturday a Tribune reporter con-versed on the subject with many of the leading merchants and exporters, all of whom gave their opinions freely, agree-ing as to the condition of the market, but differing somewhat as to the relative influence of war rumors and the short crop. There was an average yield of wince wheat, but the spring wheat crop was one-quarter to one-third short. This was caused by the drouth, which pre-vented the full development of the ker-nel, and caused it to ripen prematurely. As a result the crop was never gathered in a better condition; it is perfetly dry, and will keep in all weathers. The shortness of the crop did not influence prices until war rumors from Europe ogened a prospect of increased demand. Dealers had been content to carry light stocks; and exporters. Hiled their foreign orders at their leisure. When an in-creased foreign demand seemed prebable, larger stocks were laid in, and haste was made in filing orders. This tended to stiffen prices, and maintain the advance which had been caused by the forst war-like dispatches. It was estimated by an exporter who had a' branch house in Liverpool that there were not less than 2,000,000 quarters of wheat (18,000,000 hashels how falout, on the way from Americas to European ports, a large-This company has been doing business Ontario and Quebec for nearly two This company has been doing business in Ontario and Quebec for nearly two years, and in consequence of great carefulness in the selection of ricks it has been singularly exempt from losses.
