The fact was

What gives the pitched ball its speed There can be but one answer. All the momentum is imparted by that sweep motion begins to the instant when the hall leaves the fingers on its flight scross the plate. This is simple, clear, conclusive. Push a barrel in front of you on the ground. If you give it a sudden kick

with your foot it will roll a certain distance. If you give it a long, hard push, it will roll much further. The same simple law applies to the force behind a baseball speed? From coast to coast the public In seeking first hand information. Other things being equal, the greater recognizes in him the successor of the long consult the man himself. And so I the sweep of the hand that drives it the remembered Russe. They recognized questioned Johnson. But he knew no greater the speed with which it will travel. his vast superiority to other pitchers of more than any one else whence came As the pitcher swings his arm to delive the type, but do not explain wherein that this wonderful gift. Cy Falkenberg. If we glance at the figures comparatively the only intelligent way of studying them, we shall see Johnson's superiority.

Cy Falkenberg has a reach of 79 1-2 inches, but the human obelisk has an altitude of no less than 77 inches. His excess of reach than is 2 1-3 inches above normal. Slim Sallee has a reach of 78 inches, but the Hogginsport portsider surveys the world from an elevation of 75 1-2 inches. Gregg has a reach of 77 inches but he is 6 feet 2 1-2 inches. Christy Mathewson has a reach of 76 inches, full three inches beyond what it should be normally. Walter Johnson should be normally. Walter Johnson is 6 feet 1 inch and has a reach of 78 1-2 inches. Here we see a variation of no less than 5 1-2 inches. This is a variation from normal verging almost on deformity. It is the greatest we have ever seen in the case of a pitcher. 'Ed Reulbach has a reach of 77 1-2 inches and a height of feet 1 inch. His excess reach is 4 1inches. It is only necessary to add that in his prime Reulbach was the speediest pitcher in the National league.

Part of this extreme reach is taken up by breadth of shoulder, part by the nonpitching arm. Let us examine the pitching arm itself and we will gain a more direct insight into the situation. The figures briefly are as follows-:

Length of pitching arm: Gregg, 32 inhes; Sallee, 32 inches; Reulbach, 33 inches; Falkenberg, 33 inches; Johnson, 34 inches.

These figures are decisive. With the exception of Reulbach, Johnson is the

CANADIAN BREEDER SELLS HIS STRING States he Cannot Compete With

Americans in the Business

New York, Oct. 1.—Charles S. Campbell, one of Canada's best known owners and breeders of thoroughbreds, has confirmed the rumor that he would give up breeding horses in Canada and in future take up the breeding industry in the United States. This action is a protest against the prevailing Canadian customs conditions, under which Campbell considers that he cannot compete with the American neighbors in the breeding

Campbell will sell the majority of his horses, particularly those which he usually winters in Canada, He will select a few mares from his string of brood mares and ship them to Capt. W. T. Presgrave at Salsbury, Md., where they will be bred. Of the racers he will retain such horses as Corn Bloom, Lindesta. Bwana Tumbo and one or two others which he has always wintered at the farm

The horses to be disposed of will be offered at auction within a short time, so that they will have passed out of the ownership of Campbell previous to the time for going into winter quarters.

The retirement from the breeding industry in Canada is to be regretted. Camp-bell has for some years been among the leading owners in Montreal, and has won the King's Plate and Provincial Nursery. spring meeting at Blue Bonnets and at the spring meeting of the Connaught Park Jockey Club at Ottawa.

The horses owned by Campbell, which have usually been wintered in Canada. have always been looked after by Trainer Allan Bulcroft, while those wintered in the United States are under the care of apt. Presgrave.

Campbell pointed out the many advantages gained by the Americans over the Canadians in importing horses from England through the customs house, and stated that it was through this and the now numerous registrations required in Canada that he was retiring from the industry in Canada.
