## The highest Assessment in the History of Fredericton, but a Large Reduction Promised.

analis of the city are conducted with eason—able economy, there is no good reason why there should not be a large reduction next year, and, why the annual tax bill of the citizens ought after a year or two to exceed the sam of \$30,000. This year it is \$40,000, that is to say the assessment for the present.

in the history of Fredericton

his \$4,000 is made up as follows:

the assessment of \$5,000, for principal and interest of debentures, is made up of \$2,000 for principal and \$3,000 for interest. The amount of these assessments will vary from year to year, according as the debentures

would have been better to have spread this assessment over two or three years, especially as the revenue from the consumers of water would be constantly increasing. The Council thought otherwise, and it may well be that the majority of the rate-navers will Geo. U. Hay, of St. John. The latter, how

No doubt a very considerable portion of this attendance.

as low as we need expect to pay for some time. It is less than St. John pays, although that city boasts of having more than enough revenue paying assets to meet charges for interest. The assessment for schools cannot very well be reducted according to the composition of the comp justice, the fire department and the support of the poor can scarcely be made much less Mrs. Tippet being with her in the carriage, of the poor can scarcely be made much took than it is at present, so that we/must look for any reduction in the annual tax bill, which was standing in front of Mr. Joh of the debenture debt. The city will place up on the market this year as above intimated \$10,000 of 5 per cents., and the school Trustees about \$12,000. In the fact that city debentures at 5 per cent. have brought a little better than par on an average, it is worthy of the consideration of the School Trusteif they ought to issue any more 6 per cents. In the present state of the money market, not much difficulty ought to be found in floating debentures at par at 5 per cent. and not much difficulty ought to be found in floating debentures at par at 5 per cent., and in view of the fact that the security offered by Fredericton is undoubtedly ample, it would seem to be a mistake to offer to pay more than 5 per cent. for money. Evan is from adventitious circumstances the debentures should have to be disposed of for a literature of the Montreal Herald,

Derauged in Mind.

Mr. Duncan Shaw of St. John who cam badly deranged in his mind, so much so as to cause his friends to have him removed to the gaol previous to having him taken to the asylum at St. John. While in the gaol he took the straw out of his bed and placing it in a corner of the room set fire to it. Mr. Hawthorne noticing the smoke went to the room and discovered the fire just in time to prevent serious damage to the building. The man made a second attempt to set fire to the room, but was prevented from doing any damage by the keeper. He was removed to the asylum Monday morning. Previous to his arrest he made three attempts to set fire to a house in Wilmot's Alley. He was detected by the Police while in the actof holding lighted paper in the window shutters.
On observing that he was seen he ran and
hid in Mr. McCarthy's barn, where he was
taken without difficulty.

THE SUNBURY SCANDAL. Beckwith's Explanation of the Al-

a GLEANER reporter called upon him on Friday, at his office in the Department of Public Works. He found Mr. Beckwith sitting and Queen's of the American Turf. vis-a-vis with a model of a bridge pier, designed so as to bring the weight of the road-As the time for the payment of the annual tax bill draws near, the citizens are beginning to talk about the amount they have to pay, and debate as to the probability of there being any reduction in the future. It is therefore satisfactory to be able to say that, if nething unforeseen happens, and the affairs of the city are conducted with reasonable economy, there is no good reason why there should not be a large reduction next.

> the Public Works Department was to pay upon it. Mr. Beckwith said that he did not upon it. Mr. Beckwith said that he did not appraise the value of the bridge, but had merely reported to the Department the value put upon the work by Mr. Perley. "When a member of the Government tells me," said Mr. Beckwith, "that a bridge is to me," said Mr. Beckwith, "that a bridge is to quite a head-quarters for horses and horse-and many the good story is told of the costa certain sum, my duty is simply to report that sum as the cost, and I am not supposed that sum as the cost, and I am not supposed to stake my professional reputation as to the price being reasonable. In this case, Mr. Perley saw my report before I male it, and the cost of the day. Fast trotting is comparatively of modern introduction as

Mouday. Whether the essential element of it is Truth, Scott Act Whiskey or Schenck Interest will be Constantly Diminishing
The total amount of the debenture indebtedness of the City is \$196,600—of which \$90,000 is for water-works, \$20,000 for schools, and \$86,600 for ordinary city debt. This last item will be reduced \$2,400 this year; but new debentures to the amount of, at least, \$12,000 will have to be issued on account of the new school house, and \$10,000 on account of water-works, so that the City will start next year with a total debenture debt of \$216,200. The three items in the assessment which are especially worthy of notice are the \$7.750 for mubile works.

Heer, it is difficult to ascertain. It was reported that an individual, who declined to disclose his identity, while out sailing in a bark canoe on Sunday last, in the vicinity of the Nashwaaksis, saw a sea monster of the serpent description, about 30 feet in length with a body as large as a barrel. It chased the canoe, he says, for some distance, until the occupant becoming frightened, stered his canoe up the Nashwaaksis, beached her and took to terra firma. Here there was less terror and firmer footing, and the was less terror and firmer footing, and the canoe, he says, for some distance, until the occupant becoming frightened, stered his canoe up the Nashwaaksis, beached her and took to terra firma. Here there was less terror and firmer footing, and the was less terror and firmer footing, and the was less terror and firmer footing, and the was less than the famous trother whose jaws he had just escaped.
