" i bis Company added about \$90,000 to its permanent capital, for the increased protection of its Insurers. This step disincily shows that the Company has always acted upon the principle enunciated by one if the directors at the last Annual Meeting of the proprietors—that the interests of the assured have a paramount claim on the directors - a claim superior even to that of the shareholders themselves.

"From that moment, as might be expected, the Company attained the bighest consideration throughout the country, and has retained it ever since. The result is shown in the anexampled fact that its Fire Revenue alone rose in about five years from little more than £30,000 to about £130 000!

" A further cause of this rapid growth lies somewhat more below the surface, but learn that no fire office possessing half the above revenue annually de posits its accounts with the Registrar-general.

"The resources and balance-sheet of this great Company are, on the contrary, annually registered, and unmistakeable evidence is thus given periodically of its capacity to meet its engagements."-Morning Herald, December 26, 1855.

"Indeed, the bonus of the 'Royal' may be pronounced to be larger than any yet declared by the mass of the English offices. Here is an office which yields a fairly earnest and wholesome reversionary bonus of 80 per centum in its Life Branch, and in regard to fire operations, can make this very enviable boast, that it has exceeded ho Fire business of all but two of the London Fire offices - viz.: the receipt of rearly £130,000 per year in Fire premiums alone - some of which ancient offices have been in existence for a century! Equally successful and singular in both lepartments. Indeed, the Life Departnent may be said to present results equally s worthy of mention." -- Morning Chronicle, November 28, 1855.
