GENUINE ASPIRIN HAS "BAYER CROSS"

Tablets without "Bayer Cross" are not Aspirin at all

Get genuine "Bayer Tablets of Aspirin" in a "Bayer" package, plainly marked with the safety "Bayer Cross".

Genuine "Bayer Tablets of Aspirin" are now made in Canada by a Canadian Company. No German interest whatever, all rights being purchased from the United States Government.

During the war, acid imitations were sold as Aspirin in pill boxes and various other containers. The "Bayer Cross" is your only way of knowing that you are getting genuine Aspirin, proved safe by millions for headache, neuralgia, colds, rheumatism, lumbago, neuritis, and for pain generally.

Handy tin boxes of 12 tablets—also larger sized "Bayer" packages can be had at drug stores.

Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monocetate of Salicylic Acid.

SUNNY CORNER

Sunny Corner, Sept 1—Misses L. Stewart L. Matchett and V. J. Nolan have gone to St. Stephen for the winter.

Misses Greta McTavish, Whitney-

ville, is spending a few days with relatives at the Corner.

Miss Roberta Johnston spent the 1st (Labor Day) in Blackville.

Misses K. Dunnet and Zaida Johnston are the guests of Miss Rose Tozer this week.

Pte Samuel Mullin who has been in a military hospital in St. John for the past month arrived home Saturday accompanied by his English bride, they will reside at the former home for the present.

Mrs. Walter M. Matchett has gone to St. John to join her husband for a few days visit. Driver Matchett recently returned from Blackford and has accepted a position in the above mentioned city.

Mrs. Martin Fox, Bartibogue, was the guest of her sister Mrs. W. J. Murphy last week.

Deepest sympathy is extended to Mr. and Mrs. John Harris, Newcastle in the loss of their daughter, Margaret had many friends up here who loved her dearly.

Mrs. Edward Menzies, daughter Edna and Miss Jardine spent Thursday and Friday at the Corner.

Mrs. Percy Gremley, Newcastle was the guest of her mother, Mrs. Charles Mullin last week.

Mrs. Frederick McAllister and Mr. Albert McAllister were visitors in Newcastle Tuesday.

HER OFFICIAL POSITION.

"If I had a wife she would be my treasure," sighed the old bachelor.

"Well, that's better than having a wife who is your treasurer," signed the married man.

Grading Up The Farm Flock

In 1910 and 1911 a flock of Western range ewes was established on the Brandon Experimental Farm to be used as foundation stock in a grading up experiment. They were the usual type of range ewe, small and mean looking, showing a great mixture of breeding but with McInno blood showing up rather strongly throughout. These ewes were bred to a good purebred Oxford Down ram. When their lambs came to breeding age, another ram of the same breed was used and this line of breeding kept up consistently. The flock was increased about 50% in numbers at first, then bred at a uniform number each year. Each fall the least desirable of the ewes were culled out and the remainder kept for breeding. In the fall of 1916 the last of the original ewes were disposed of, and in the fall of 1917 all first cross ewes that showed in their appearance any sign of their mongrel origin were disposed of. Consequently the breeding flock in 1918 consisted of a lot of Oxford Down grades of uniform size and shape, all with dark brown faces and wool of uniform type. This complete change in the appearance of the flock was accomplished in this short time simply by using each year a pure-bred sire. In this time the average size of the sheep was increased nearly 50% and the average wool clip about 30%. The first cross of Oxford on the range blood produced a sheep of decidedly Oxford character with an increase in size, but they were not uniform in appearance and many showed signs of the dam's breeding or lack of breeding. The second cross was a great improvement over the first, and the third cross resulted in a sheep that was practically indistinguishable from a pure-bred.

While the Oxford Down breed was used in this experiment, it is not the purpose of this article to recommend that breed above others. The range ewes were conspicuously lacking in size, and the Oxford was chosen particularly to increase the size. Other breeds that might have been used for that purpose are the Hampshire or the Suffolk of the Down breeds or the Leicester, Cotswold or Lincoln of the long wools. Or, if breeding up is to attain more compact form with earlier maturity, the South down or Shropshire might be used.

The results obtained in this experiment have been duplicated by many practical sheep raisers throughout the West. There is no reason why many others should not attain similar successes, changing their present nondescript mongrel flocks to fine, uniform, handsome flocks closely resembling pure-breds of the breed they choose to use stress from and reject the culls. This, with good general care, and feeling; will very quickly accomplish the desired result.

LEMONS MAKE SKIN WHITE, SOFT, CLEAR

Make this beauty lotion for a few cents and see for yourself.

What girl or woman hasn't heard of lemon juice to remove complexion blemishes; to whiten the skin and to bring out the roses, the freshness and the hidden beauty? But lemon juice alone is acid, therefore irritating, and should be mixed with orchard white this way. Strain through a fine cloth the juice of two fresh lemons into a bottle containing about three ounces of orchard white, then shake well and you have a whole quart pint of skin and complexion lotion at about the cost one usually pays for a small jar of ordinary cold cream. Be sure to strain the lemon juice so no pulp gets into the bottle, then this lotion will remain pure and fresh for months. When applied daily to the face, neck, arms and hands it should help to bleach, clear, smoothen and beautify the skin.

Any druggist will supply three ounces of orchard white at very little cost and the grocer has the lemons.

Motion Pictures Of Matapedia Valley

While on the C. N. R. special train from Halifax to Quebec recently, carrying newspaper men and moving picture operators, who were following the Prince of Wales on his tour, some of the motion picture men secured views of the Matapedia Valley. They mounted the deck of the locomotive tender at Campbellton and operated their cameras while the train sped through the Morrissey Rock Tunnel and across the Restigouche Bridge. At a point beyond Matapedia station the train was stopped and several group pictures were filmed.

These pictures will be shown in connection with the new Films of the Prince's tour.

Builds And Binds A Nation

Truly national in character is the exhibit of the Canadian National Railways in the Railway Building at the Canadian National Exhibition, Toronto. The ensemble is most striking, and the electric lighting of the dome, combined with most artistic draperies, lends a spacious character to the whole exhibit, while the arrangement of the display in general permits of freedom of movement to view the various exhibits in detail.

The frieze decorations show typical landscape views of the nine Provinces, with the coat of arms of each the connecting link bearing the highly significant reminder that this is an exhibit of "a line that builds and binds a nation."

Three sides of the octagonal building are occupied by a huge topographical map of the Dominion, on which are shown in brilliant illumination the names of the principal points reached by the Canadian National Railways, "the great stool strand that threads the land" being indicated by broad band of red.

No better or more comprehensive plan could have been adopted to demonstrate that 14,000 miles of railway are now under Canadian National management, and that the Canadian Northern, the Intercolonial and Transcontinental railways have been amalgamated into one vast system. To further demonstrate the fact that the system traverses every Province of the Dominion and reaches every Provincial capital, the observer by an ingenious arrangement of flashing lights, is taken in fancy right across the continent: from Halifax to Vancouver and Victoria, stopping momentarily at the principal points enroute and then brought back again. The map should prove of much educational value in telling just what the Canadian National Railways are and the territory they reach.

Beautiful Transparencies

A rustic centrepiece and several rustic lanterns contain a me really beautiful photographic transparencies which do not fail to call attention to Canada's innumerable scenic gems, while the hunter's log cabin with its sporting trophies is also utilized for the projection of dissolving views and moving pictures of scenic and sporting and industrial life.

Forestry, pulp and paper, minerals, Indian trophies and agricultural features complete an exhibit on which there has evidently been much careful preparation and considerable fore thought. Nor has the royal visit been forgotten, for on top of the pyramid devoted to a beautiful display of British Columbia fruit stands the Prince of Wales' crest, the three feathers worked in grain with the motto "Inch Dien" Altogether it is an exhibit which every visitor should see if he would learn of Canada's national system of transportation.

Canadian Egg Laying Contests Popular

The Egg Laying Contests throughout the Dominion are attracting considerable interest. Already the entries are being rapidly filled by birds from all classes of poultry breeders. The fancier and the commercial man are being represented as are also the backyard and the farmer, the old breeder and the amateur. Canadians are not going to have it all their own way either for both the United States and England are going to be represented.

The Dominion Experimental Farm is conducting no less than seven contests this year reaching from Prince Edward Island on the East to Alberta on the West. At Ottawa will be held the "Canadian" open to the world. Other contests will be conducted at six of the Branch Farms throughout the Dominion. The farms selected are Charlottetown, P. E. I. Nappan, N. S. Cape Rouge; Que; Brandon Man; Indian Head; Sask; and Lethbridge, Alta.

All contests start November first and continue for 52 weeks. Application must be made to Dominion Poultry Husbandman, Experimental Farm, Ottawa. The time of receiving applications has been extended to October 15th.

PILES

Do not suffer another day with itching, bleeding, or protruding Piles. No surgical operation required.

Dr. Chase's Ointment will relieve you at once and so certainly cure you. See a list of dealers, or Edman, Stone & Co., Limited, Toronto. Sample box free if you mention this paper and enclose 25 cents to pay postage.

NO MORE LEAKS

Leaky tubs and pails are an exasperation and a nuisance. Abolish them! Free your household from this annoyance.

EDDY'S INDURATED FIBREWARE WASHTUBS AND PAILS

cannot leak, because they are made in one piece, without joint or seam. They are tough and impervious to liquids, yet so light and resilient that they never become battered or dented. They keep the water hot a long time, because they do not conduct heat as metal does, yet they are easy to lift and easy to carry. They cost less than metal, too, and last longer for they are less liable to accidents, and rust will not attack them.

Only a GOOD White Lead can hold World Supremacy for 200 Years

TWO hundred years ago—when the sign-painter was an artist of every high standing—the best white lead for any kind of painting was Brandram's Genuine B.B. White Lead. Today, the most fastidious painters still choose this world-famous white lead for their most particular work.

Brandram's Genuine B.B. White Lead

The reason is not far to see. Most white leads are produced by one process of corrosion—such as the so-called "Old-Dutch" process, "Chamber" process, or some more or less mechanical process. But Brandram's Genuine B.B. White Lead is a combination of different processes. Thus, particles of different shapes and sizes are merged so as to form a product of wonderful smoothness, capacity and covering power.

Measured in terms of cost per hundred pounds, Brandram's Genuine B.B. White Lead is the most expensive lead on the Canadian market. But, considered from the standpoint of covering capacity and length of service, it easily outclasses all other white leads, and proves the most economical in the end.

"Save the surface and you save all!"
